

2020 - 2021
FISHING TACKLE CATALOGUE

ABOUT J.M.GILLIES

It was over 91 years ago when John Malcolm Gillies began servicing the fishing tackle industry to satisfy the needs of the fishing public with local hand tied trout flies. From those humble beginnings J.M.Gillies evolved and began to distribute fly fishing tackle before it moved into general fishing tackle, firearms and other sporting goods. With over 91 years of service to the fishing tackle industry, J.M.Gillies Agencies continues to offer them highest quality, innovative and most sought after brands of fishing tackle in Australia today and we are still proud to be 100% Australian owned.

NEW PRODUCTS FOR 2020-2021

JM Gillies continue with their innovation by releasing new products each season and this season there are many new products to excite both saltwater and freshwater anglers alike.

BLUEWATER BULLET BAIT AND STICKBAITS

The Floating and Sinking Stickbait from the Bluewater stable are built tough to take on the most ferocious predators when targeting Bluewater species such as GTs, Tuna and Tarpon etc. The Stickbait is hand made and handcrafted using a super clear resin and features a heavy duty wired through construction. The newest addition to the Bluewater range is the Bullet Bait. It is rigged with VMC 7266 5/0 hook and a stainless steel heavy duty split ring.

BLUEWATER SAURY

The Saury lure is designed to mimic the popular pelagic baitfish and will be in its element chasing Tuna, Mackerel and all other predatory species. The Saury comes with a 8/0 VMC single hook on the front, a 9/0 single on the rear, with heavy duty rings and hardware. The heavy duty, stainless steel, wired through construction ensures the lure will stand up to the toughest sports fish. The reinforced bib design compliments the nose wired tow point to ensure the lures swim perfectly out of the box and require minimal tuning after use.

The Saury is available in 10 colours and some of those feature the patented "LIVEGLO" fluorescent technology. The technology incorporates luminous and ultra violet additives that are somewhat invisible to the human eye but not to predatory fish. The innovation and design in Lance Butler's lures is something that sets his lures apart from most mainstream lures. Enjoy using these quality Australian designed lures.

BLUEWATER MINNOW

BLUEWATER

NEW PRODUCT

+12

DUE DEC 2020

NEW BLUEWATER MINNOW

The all new Bluewater minnow has been developed with the toughest of Bluewater species in mind. With many conventional lures the action can quickly become untuned with knocks and bumps but this new in-mould bib and body will ensure the lure will track true and straight time and time again without the need for adjustment. The new design also allows for exceptional speed to chase the fastest pelagic species with it comfortably holding in at 8 knots.

The Ghost mould innovation will feature colours and designs never seen before in Bluewater lures, these colours will mirror the most predominant baitfish across both the Pacific and Indian Oceans as well as some more wild and unpredictable colours that will entice the toughest predatory fish.

BLUEWATER TROLLING SKIRT

The Bluewater Trolling Skirts feature unique hand poured heads, attractive graphics and finish detailing our trademark Bluewater logo in the eye, supple silicone skirt, quality finish to the resin head and skirt attachment, two different swimming actions, tried and tested fish catching colour combinations.

The 6", 8", and 10" Bluewater lures are considered small to medium in size and ideally would perform better if rigged with a single hook. The 8" and 10" version could accommodate a two hook shackle rig, however, if the gauge of the hook is heavy this could dampen the action of the lure. It is recommended that chafe tube is used over the leader through the lure head to avoid abrasion, and a stopper used above the rigging inside the lure skirt to stop the rigging pressing against the head at the point of connection.

Target species: Billfish, Marlin and Sailfish, as well as other pelagic species including Yellowfin, Bluefin Tuna, Wahoo, Spanish Mackerel and Dolphinfish.

BLUEWATER ROCKET POPPER

The Bluewater P163 Rocket Popper is an extremely versatile lure that can be fished in a number of different ways. The P163 features a special tail-bias weighting system that serves two main purposes. The heavy tail weight causes the lure to fly straight and true through the air - meaning the P163 casts like a rocket. The tail weighting also causes the lure to sit nose-up in the water during the retrieve. This nose-up position causes the lure to literally skip and dart along the surface during a straight, high-speed retrieve; perfectly imitating a fleeing Garfish or Saury. The P163 can also be fished with a slow, jerking motion which will see it swim with a "walk the dog" action, much like a Stickbait. Ideal for all bluewater casting, and will appeal to all large pelagic species.

KNIFE SHARPENER

The Bluewater Knife Sharpener is a compact design with a two stage knife sharpening system. It features both ceramic, tungsten and a diamond stone on the top section. The sharpener also has a suction pad base that allows you to secure it incredibly firmly to any clean flat surface. Measuring in at only 68mm, it takes up barely any space and is the perfect addition to your tackle box.

Code: 03CBKS

BLUEWATER REACTION PACK

The NEW Bluewater Reaction Pack comes supplied with quality lures and tackle to help you target your favourite Bluewater species. The two lures are the famous Saury and Minnow models in our most popular selling colours. Also included in the Reaction Pack is a 8"/20cm stainless steel Bluewater Knife with sheath and a Bluewater Wind-on Leader to help ensure positive hooks ups and landing of your target species.

Code: 03CBRP

TASMANIAN DEVIL BLADE

The Tasmanian Devil 'Devil Blade' features a uniquely designed spinner blade which has been created to match the famous Tasmanian Devil lure. The blade provides a distinct action as it spins through the water. Custom Tasmanian Devil paint designs that have been created specifically for freshwater species. Each lure is equipped with quality terminal tackle and VMC treble hooks.

LENGTH MM	WEIGHT GMS	SWIMMING ACTION	ITEM CODE
20	3.8	Spinning	18BL38 ..
30	5.4	Spinning	18BL54 ..

COLOUR RANGE

TASMANIAN DEVIL SPOON

The Tasmanian Devil 'Devil Spoon' lure offers dual attraction of vibration and flash. As the spoon travels through the water it flutters from side to side and emits a vibration that attracts fish even in cloudy water. The polished under side of the Devil Spoon produces a flash attraction, ideal in clear running water and is a proven trigger for predatory species.

COLOUR RANGE

TASMANIAN DEVIL MONO LINE

The Tasmanian Devil Mono range of lines are supple and are processed with real camouflage effect that imitates silt and plankton floating in water; moreover, the brownish 3D captures natural essence of chameleon. When you have the line above water, fluorescent glitter helps you trace its direction easily, but the part in the water where light penetration becomes less, the line turns brown with less reflection. This unique line has excellent knot strength and the coil memory and shock-resistant performance is improved making it suitable as reel mainline and as leader.

TASMANIAN DEVIL LEADCORE LINE

Tasmanian Devil Leadcore is an innovative line that allows a lure or fly to be trolled at varying depths without the aid of a paravane or trolling sinkers. The leadcore trolling line is constructed from tightly braided nylon multi-filament woven over a core of pure lead resulting in a fine diameter line with high visibility colour metering every 10 yards. The colour metering makes it easy to monitor the depth being fished.

TASMANIAN DEVIL LURES

Tasmanian Devil lures are a unique Australian product designed for trolling, casting or jigging in fresh and saltwater. The lure action is due to the revolutionary winged technology that causes the lure to swim in an irregular manner, darting and diving, simulating the movement of wounded fish. This pulsating action is transmitted to the rod tip that will show as a "nodding action" that is proof that the lure is swimming correctly. If this rod tip action is not present, either a piece of weed, or a fish is on the hook. All four sizes of the Tasmanian Devil swim in this erratic manner and this is the reason our lures are so effective. The loose flight stainless steel centre or the line-through rigging method used with the 7, 13.5, 20 or 26 gram version prevents fish from throwing the hook as both methods allow the lure body to slide up the line away from the fish. Regardless of the species that is targeted, the Tasmanian Devil qualifies as an all round lure. Whatever your quarry, from Brown Trout and Rainbow Trout to School Mackerel and Salmon, the Tasmanian Devil is a sure fire hit and will land you your target species time and time again. Effortless to cast, simple to troll and easy to jig.

ABOUT WIGSTON'S LURES

In 1934, Eddie Wigston founded a retail store in the town of New Norfolk situated on the Derwent River (a popular trout fishing district) 22 miles upstream from Hobart, the Capital of Tasmania. As a keen marksman and an avid fisherman he operated the business known as E.L. Wigston selling radios, firearms and fishing equipment until he was joined by sons Ian and Garth. The Wigston family are keen anglers and during the 1960's considerable time was spent experimenting with home made fishing lures. Over the convivial glass of beer at the local club one Friday evening during the late 70's, the concept of mass production of lures was discussed at length by Eddie, Ian and Garth.

THE LURE

The Lure was to consist of a hollow weighted torpedo shaped central core surrounded with plastic including curved wings out each side which give the lure its unique action.

TROLLING AND RETRIEVE SPEED

The best way to gauge the correct speed of the lure when trolling or cast and retrieving is to watch the rod tip. The tip of the rod should be nodding, or pulsing with the lure as it moves through the water with its uniquely irresistible action.

RIGGING: 7gm-13.5gm-26gm

Thread the line through the lure and then either; tie to split ring attached to a hook or thread through a bead and tie to directly to hook. **RIGGING:20gm** With Dual tow points the 20gm allow the lure to be fished at different depths. Running the line (a) will see the lure swim at 2.2 m. Running the line through the special tow point on the back of the lure (b) will make the lure dive to 3.3 m.

Ultra Violet
Paint

WALLEYE GRUB

The Walleye Grub features a ridged body that provides plenty of water disturbance in addition to that created by the big curly tail and is made of tough, durable plastic that remains supple to the touch and retains its action no matter how long it's fished.

GORILLA GRIP

For many fishing applications, to light tasks and heavy-duty work, the Gorilla Grip patented gloves are the go-to choice for anglers and the handyman alike. With maximum durability, dexterity and a trusted never-slip grip, Gorilla Grip guarantees superior grip every time. Gorilla Grip gloves are constructed of nylon and dipped with a specialised coating to keep hands protected no matter the application, wet, dry or oily.

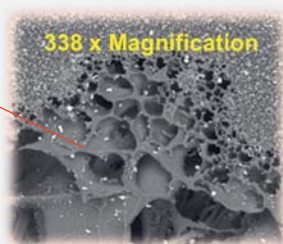

GLOVE FEATURES

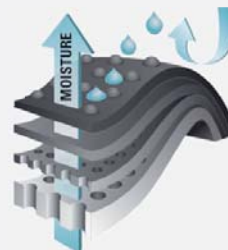

- A: Formfitting design B: Breathable nylon shell C: Fitted elastic cuff
D: Patented non slip technology
E: Stain resistant finish

PATENTED TECHNOLOGY

The patented technology draws moisture to the surface of the glove where it quickly evaporates, or is transferred back to the inner layers of the glove. This aids in providing maximum grip during both wet and dry applications.

Gorilla Grip is a lightweight, breathable and high dexterity multi-purpose glove with a patented grip coating that provides a maximum grip under any conditions.

GORILLA GRIP MAX FINGERLESS

These new Gorilla Grip Max Fingerless gloves allow for maximum dexterity, comfort and performance. Another feature of these gloves is the extended cuff that protect from the sun. The gloves have a breathable light knit shell is skin tight and quick drying and feature the patented Gorilla Grip Technology that provides maximum grip in dry, wet and oily conditions.

GORILLA GRIP 3/4 DIP INSULATED

These new Gorilla Grip 3/4 Dip Insulated gloves feature an insulated liner for cold weather and fish cleaning use. The 3/4 dip keeps hand dry and the breathable light knit shell is skin tight and quick drying. These gloves also feature the patented Gorilla Grip Technology that provides maximum grip in dry, wet and oily conditions.

ORIGINAL GORILLA GRIP GLOVE

From light chores to heavy-duty projects, the Original Gorilla Grip glove is specialised for maximum durability, dexterity and hand protection. These lightweight gloves allow your hands to breathe during tough tasks while maintaining an unmatched grip. Perfect for any handyman projects and fishing needs.

VEIL GLOVE

The Veil Gloves are a must have for any tackle box. They're lightweight, maintain a grip in the wettest conditions and fit like a second skin that protects hands from the sun. The proprietary polymer technology on the palm pulls moisture away from the surface and provides maximum grip in wet and oily conditions and the Veil gloves also features the exclusive Veil camo.

A5 CUT GLOVE

On the boat or at the cleaning station, Gorilla Grip A5 Cut gloves are a must for every tackle box. This glove features a highly breathable, flexible design with an ANSI level 5 industrial cut protection rating featuring proprietary polymer technology on the palm that pulls moisture away from the surface and provides maximum grip in wet and oily conditions.

RHINOFLEX A5 CUT GLOVE

The Rhinoflex glove is highly-breathable and fits like a second skin allowing for natural movement and dexterity. The tough-but flexible polymer shell delivers maximum impact and abrasion protection. The glove features the ANSI level 5 industrial cut protection rating and the propriety polymer technology on the palm pulls moisture away from the surface and provides maximum grip in wet and oily conditions.

FINS FIGHTER PRT BRAID

FINS Fighter PRT differs from the original PRT in that we have improved the resin system which is applied as well as the method to apply it. This results in a rounder more abrasion resistant product that has a better strength to weight ratio than the Original PRT. Fighter PRT also is somewhat firmer (without being stiff) allowing for better performance in regards to casting distance and reduces the chances of getting rod tip wrapping. Features include 100% Spectra Fiber, high strength durability and is ideal for all tough and predatory fish.

FINS ORIGINAL PRT BRAID

PRT is a soft, flexible braid with a very tough urethane coating, a great choice for finesse fishing. Flipping and pitching into heavy structure where durability and strength are paramount, is one of the many situations where PRT shines. PRT is the current state of the art braid produced using traditional braid architecture, 30 pound PRT is the diameter of 8 pound monofilament, 20 pound like 6 pound mono, etc. Many experienced braid users find PRT to their liking as it has a familiar feel but with a durability that exceeds their expectations regarding colour retention and fray resistance.

FINS ORIGINAL PRT MULTI COLOUR BRAID

The world famous Fins Original PRT Braid is also available in multi colour. This allows you to know the exact depth you are fishing, as the line changes colour every 8yds/25ft.

FINS Metered coloured Braid, is marked with a repeating pattern of 4 colours, to allow the angler to know exactly how much of the line is off the reel. The line has 25ft colour segments of Yellow, Green, Orange and Blue with a 1ft white mark in the centre of each segment. MCB is 4 end braid with a soft "hand" and no gummy coating or colour transfer.

FINS 40G COMPOSITE SUPERLINE

At FINS we're very proud of our 40G Composite Superline. For more than 20 years we have brought you consistently high quality braided fishing lines. It is hard to describe in words how superior FINS 40G is relative to all other braids on the market. All the adjectives have been used and mostly overstated, and let's face it every box you pick up claims to be the best. We can honestly say that FINS 40G unique composite structure gives it a smooth mono like feel but it's a durable braid with the smallest diameter to strength ratio ever offered.

Colour: Chartreuse **Lengths:** 150 / 300 / 1500yd spools.

FREQUENTLY ASKED QUESTIONS ABOUT 40G

Why does 40G come in unusual package tensiles? We wanted to highlight how different 40G is compared to existing braids. As an example, most braids that are equivalent to a 6lb mono are labelled 20lb, 40G is 45lb. Also our "full disclosure" front label gives you the average break without a knot, as well as diameters in English and metric units.

What makes this line feel so smooth? FINS 40G is made with a unique process; we start with a core of SPECTRA fiber and then over-braid this tightly with 8 ends of smaller yarns.

Why does this line cost more? Smaller yarns generally cost more and the 40G's unique processing is also slower than typical braiding which is why it has such an excellent feel.

Does this line hold up well? Our pro-staff anglers report at least twice the wear as standard braids. When 40G is close to wearing out you have an advance warning as the over-braid will show damage before the core.

Will this line hold it's colour? The colour will last as long as the product, due to the colour being applied to the core fibers. 40G gets darker when wet and lighter when dry.

What knot do you recommend? We recommend the Palomar for terminal attachments, and a double uni-knot when attaching to a leader, but giving an extra wrap is always a good idea with super slick FINS 40G.

FINS EVOLVE

Fins 'Evolve' is constructed from a next generation Hybrid Fibre Concept (HFC). It has been formulated and designed for the tough Australian conditions. State of the art fibres combine to provide maximum casting distance, ultra smooth presentation and yet still meets all the toughness and reliability that you come to expect from Fins lines. Ultra-thin diameters combine with silky smooth outer coatings to provide the softest and most efficient casting line on the market. The round profile suits both spin and bait casting reels and is available in hi-vis Chartreuse for all water visibility.

* High Vis Chartreuse for all water visibility
* Exceptional diameter to breaking strain ratio

ULTRAGREEN

Though often attempted, no other manufacturer has duplicated the exclusive colour and characteristics of Maxima Ultragreen. This line becomes virtually invisible under water, particularly in freshwater and inshore coastal waters. Ultragreen is also soft and limp, yet retains Maxima's legendary tough, high durability finish for excellent abrasion resistance. Ultragreen is the best all-around line for a variety of freshwater and general saltwater fishing. Spools and casts well on spinning, baitcasting and larger conventional reels. Ultragreen's invisibility under water also makes it ideal for leader material.

LEADERS, TIPPET & FLUOROCARBON

The suppleness of on the tippet section on Maxima's Ultragreen tapered leaders, allows the fly to move naturally and appear real on the water. The stiffness of Maxima Chameleon monofilament butt allows the leader to roll over freely and lay out more smoothly. This highly effective, blended product is a Maxima exclusive. Maxima Leader Wheels are handy dispensers that conveniently fit into any box or fishing vest. Thanks to a special blend of non-flash components, Maxima's Fluorocarbon has the ability to become virtually invisible to fish. Unlike standard fluorocarbon lines, Maxima's Fluorocarbon is extremely sensitive and strong.

Maxima Treasure line is extruded with Additive Depot Protection (ADP) giving long term abrasion resistance and durability even under the toughest fishing conditions.

TOURNAMENT - IGFA

One of the key features of Maxima's IGFA Tournament Fishing Line is its durability and overall resistance to both the punishment from saltwater as well as bigger fishes. Since this particular line is designed to hold its own against the rigors of the most challenging of fishes, it delivers solid performances within its own weight class. Tested for both regular angling and tournament fishing, this line follows the International Game Fishing Association requirements to perfection.

CHAMELEON

The Chameleon range has the unique property of changing hues to match the colour of the surroundings, for invisibility in water that is cloudy or lightly stained. Designed for freshwater lakes and rivers, this line has the toughest finish of all line brands on the market. Saltwater anglers have also discovered Chameleon's toughness and it's propensity to change colour hues is perfect for fishing around kelp beds, rocks and other near shore structure, as well as bouncing the bottom for larger fish and reef dwellers.

ASARI LURE AID

The Asari Lure Aid could be the best investment you ever make as it is designed to go down your line, among the snags and catch onto your lure so that you can free it. Because you have this device, you won't be too worried about fishing those snag ridden areas where the fish are most likely to be. Available in 2 sizes: 125 & 250gm

CODE: 32ALA125
CODE: 32ALA250

Asari

The Professional Choice

VERTICAL STORAGE

The Vertical Rod Rack is designed in Australia and is moulded from high impact plastic that will not splinter or rot. Each Rod Rack can hold up to 6 rods and it will not tip over. It can be fixed to the wall with 4 screws included.

CODE : 195E4b2

Twin Packs

Unit - W:44cms x H:54cms

HORIZONTAL STORAGE

Securely store any rod type with the reel still on. This rack maximizes the capacity of your storage area and it is great for over doorways. The rod rack is a durable one piece design that fixes easily to the wall, also it keeps the rods out of reach of children.

CODE : 1952

2 racks per pack
can hold
up to 3 rods

CODE : 1956

6 racks per
pack
can hold
up to 9 rods

BERLEY BASKET

The SEADOG berley basket is very functional and easy to use. The basket is surrounded by 8mm holes which allow an even flow of berley, has a positive locking lid, comes supplied with 1.5 metres of rope and can accommodate different weights to suit varying tidal conditions, as well all sorts of berley; dry, wet or frozen.

BERLEY BASKET LARGE

- Easy access, flip open lid
- 420mm long x 170mm diameter
- Can disassemble to store flat
- 9 Litre capacity CODE:19SBPL

BERLEY BASKET SMALL

- Easy access, flip open lid
- 210mm long x 170mm diameter
- Can disassemble to store flat
- 4 Litre capacity CODE:19SBPS

- Secure rope attachment

CLASSIC 65

2DEADLY

Scan for lure action

The innovative 2Deadly is one of Lance Butler's most successful designs, and certainly one of his all-time favourites. Thanks to its unique design and profile, this creative lure can be fished as both a surface popper and a shallow diver in the same retrieve. The 2Deadly gives anglers the best of both worlds; with the splash and sound of a popper, and the flash and vibration of a diver.

KILLALURE LURE PACKS

Pre determined lure models and colour selection, takes the guesswork out of choosing the right lures for your target species. Each Killalure pack has the 3 best selling colours in each model, to ensure that you have the best opportunity available to you. The 2 Deadly works as a surface lure, as well as a diving lure, the Barra Bait is an old faithful that never lets you down, the Flatz Rats is a truly versatile lure suitable for all sportfish, the Needle Nose is a serious lure for those targeting all large species in fresh and saltwater and the 2 Deep and 2 Easy lures are fitted with the D.I.S. (Dynamic interchange system) which makes the lure vibrate strongly even at slower retrieve speed when spinning, or trolling for many species in both fresh and saltwater.

WARLOCK MOTH

The Warlock range of top water Moth lures are uniquely designed and are constructed from tough ABS plastic. Unmatched in attraction and originality, the Moth provides a one-of-a-kind top water presence that fish cannot resist. The Moth is fitted with wings that flap and create a noticeable splash and a unique sound that is proven to trigger aggressive strikes. Designed to mimic a struggling insect on the water surface, the Moth is capable of drawing heart-stopping strikes day or night. Hand painted finishes with extra strong VMC Spark Point hooks that allow you to target your favourite species with ease.

WARLOCK HARDBAITS

The Warlock range of lures are one of the most unique hard-baits currently available on the market. The key feature of the Warlock series profile is our signature S.A.P.™ or Sonic-Amplifying-Panels that are moulded into the underside of the lure's flanks. These scalloped panels reflect ultra-strong micro-vibrations that create an irresistible sonic footprint that is unlike any other hardbait on today's market. This series swims with a tight, rolling action and unsurpassed cycle rate, sending out a strong signal that triggers an instant strike instinct in any nearby predators. Quite simply, the Warlock is unlike any hardbait you've ever used before - the fish just won't know what's hit them when you unleash the Warlock series on your local waterway.

WARLOCK 52 3PKS

Each Warlock 52 3pk contains the 3 most popular colours. The 2+mt dive depth will suit most applications.

STUMPJUMPER LURES

Born on the Victorian banks of the mighty Murray River in 1986. The first wooden StumpJumpers fitted the local cod fishing environment perfectly. They dug down deep, had great buoyancy to help them jump over the stumps (hence the name) and were as tough as nails. By 1991, freshwater fishing was a boom industry in this country and there was an almost insatiable demand for cod lures. The only way to satisfy it was to swap from the traditional wooden bodies to plastic. In recent times, the demand far outstripped supply and subsequently the lures are now being manufactured offshore. With the change to plastic, there was also an opportunity to introduce what is still about the world's only truly successful interchangeable bib system.

As unlikely as it sounds, it's an idea that really works. With the deep diving bib, the No.1 StumpJumper is a great cod lure, but switch to the pointy, shallow running bib and you have a minnow lure capable of taking saltwater speedsters like Mackerel and Tuna or even Barramundi, not many other lures can do that!

REMOVABLE BIB SYSTEM

The proven swimming action and unbelievable anti-snag capabilities of the StumpJumper are combined with an exclusive patented snap-lock bib that lets you instantly alter the lures action and characteristics by changing to different shaped bibs. With a choice of hot colours and flashing metallic finishes and subtle patterns, you can change the colours of the bibs to get the attention of the fish. Mix and match lure bibs and bodies in a system that makes StumpJumper the most innovative and effective lures available today.

To change curved bibs bend down and pull out.

Flat bibs pull straight out.

AVOIDING SNAGS

The name StumpJumper is synonymous with the key benefit of the design of this lure. Used correctly it will help you avoid the frustration of being snagged. Here's how; when trolling, hold the tip close to the water and at a 90 degree angle out from the boat to allow the current and the in-built buoyancy of the lure to lift and clear the snag. With practice, the lure can be walked through most snags. Vary the length of line to stay in touch with the bottom. Bump the odd log and you know you are down there with the fish.

STUMPJUMPER MEGA

The latest addition to the StumpJumper series of lures is the Mega StumpJumper. This specialty lure is a serious lure for those chasing fish at specific depths. With the quality of technology evolving with side scan and almost TV quality pictures in sounders this lure allows anglers to hit specific depths with ease and slow troll in the strike zone for longer and better results. A patented removable bib system gives anglers every advantage now rather than relying on the fish to be over active and chasing a lure at a depth that the fish aren't.

BOMBER LONG A

Bomber's original Long A design is one of the most effective jerkbaits on the market, and is arguably Australia's most popular Barra lure of all-time. Available in 5 different sizes to cover a wide variety of applications, as well as 2 deep diving models to get down to those deeper holding fish.

The most popular "all-rounder" is the B15A size - when people talk about the mighty "Gold Bomber", this is the size that they are referring too. The 13A is perfect for Jacks, Barra, Salmon and Trout and the 14A is a great choice for Barra in billabongs and small creeks, and is also a Mangrove Jack killer! The larger BSW16A & BSW17A sizes are the preferred choice for anglers chasing metre-plus Barra in the big saltwater rivers of the Top End. They are also extremely effective in the impoundments throughout North Queensland. The newest Bombers to the range (the Longshots) have proven themselves to be a most effective.

J-DUSTER KING RIG

The Bomber J-Duster King Rig is a quality assembled rig that saltwater fish can't resist. The J-Duster King Rig blows other ready made rigs out of the water. Spend your time fishing and not making up rigs with the Bomber J-Duster King Rig. Quality is never an issue. Every saltwater jig is made as if we were going to fish them ourselves. Made with our popular 'J' Duster #6 single strand stainless steel wire and 2 saltwater grade 6/0 hooks. The mouth on the J-Duster jig imparts a unique action.

JITTERBUG

Well respected as THE top water lure for night fishing, the Jitterbug has proven its power to ignite explosive strikes throughout the day. Fred Arbogast's Jitterbug was first introduced in 1937. The Jitterbug has a double-cupped lip, placed at precisely the correct angle, produces the loud, rhythmic, surface busting sound that is proven to be irresistible to every surface known feeding fish.

NORMAN LURES - SPEED CLIPS

Think of Speed Clips as split rings that open. After tying your line to a Speed Clip, squeeze the arms together to open the jaw, then slip one arm completely through the eyelet of your lure until the jaw can freely close. The Speed Clip should move freely on the lure's eyelet. Made of stainless steel, Speed Clips can be used in fresh and saltwater.

GILLIES VIBE

With meticulous attention to detail, the new Gillies Vibe lure combines the realistic soft X-Flex body and the vibration of a hard vibe bait into one. It's uniquely designed forked tail allows additional vibrations upon retrieval with a seductive, tight wiggling action that mimics a live bait. Gillies Vibe's are the perfect bait for Barramundi, Snapper and many other species. Fitted with extra strong VMC Spark Point hooks that allow you to target your favourite species with ease. Gillies Vibe's are definitely a great all-round lure for both freshwater and saltwater species.

GILLIES SOFT MULLET

The evolution of soft plastic baits has greatly advanced over the years virtually giving anglers a wide variety and selection for all game fish. Soft plastics offer many advantages over hard bodied lures such as crank baits and spoons that don't have the soft texture as real food. When a fish strikes a soft plastic bait it feels natural, so fish will mouth it longer giving the angler extra time to set the hook. The range of Gillies soft plastic Mullet style lures have been tested by many guides and have accounted for some fine catches. There are 2 sizes in the range to choose from with 8 colours available in each size.

GILLIES OCKTA

Incorporating Japanese design and technology, the Ockta lure is effective in attracting reef and bottom dwelling as well as pelagic species. These lures have a unique action and can be fished with most retrieve styles. They can be straight jigged, bounce jigged while drifting and cast and retrieved. With two exceptionally sharp swinging forged hooks set up on Kevlar connectors, hook up rates are increased. Ockta lures are perfectly balanced as to allow the lure to pulsate the skirts giving the appearance of a swimming octopus. There are 8 sizes from 40gm for the smaller estuary species right through to 300gm for the big bottom dwellers.

GILLIES BAITFISH

Gillies Baitfish lures are uniquely designed to imitate fleeing baitfish. The high quality laser finish reflects light at a variety of angles to give maximum attraction. The versatility of this lure allows for casting, trolling and jigging. Fitted with quality split rings and VMC treble hooks the Gillies Baitfish is available in Silver Whitebait, Blue Mackerel and the two most recent patterns, the Oil Slick and Clown. These lures are very effective for Tailor, Salmon, Trevally, Kingfish, Tuna and other Pelagic species.

GILLIES PILCHARDS

The Gillies Pilchard combines the shape, action and reflective flash to attract fish from afar. Not only does it cast like a bullet, it can be trolled or jigged as well. A handy tip when jigging in deep water is to switch the hook to the front end allowing the natural bias to take over and track straight. Very effective for Tailor, Salmon, Trevally, Kingfish, Mackerel, Tuna and other pelagic species.

GILLIES SINKER MOULDS

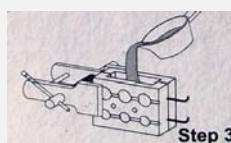

Gillies range of sinker moulds represent excellent value for money by offering a multi sized array of sinkers per mould. A great way to save money and to recycle lead.

Step 1

Step 2

Step 3

TIPS

Melt lead in a heavy cast iron pot in a well ventilated area and make sure that the pouring ladle or spoon is dry. Pre-heating the sinker mould will allow the molten lead to flow. Protective clothing and a breathing mask such as a respirator is highly recommended.

SNAP-LOC ROD HOLDER

The SNAP-LOC Rod Holder is a unique, one-step, instant strike Rod Holder that's ideal for general light to medium trolling and bait fishing. It's versatile and adaptable to any boat or fishing situation. The Universal Rail & Deck Mount Rod Holder offer many different mounting possibilities. When you place the rod, either spin or baitcast, into the holder, it pushes the front lever down and locks the rear lever over the top of the rod butt. The weight of the rod is sufficient to firmly lock the rod, any additional downward weight, even

SNAP-LOC

SNAP-LOC KEY FEATURES

- Foolproof locking device
- Suits both spinning and overhead reels
- Additional security lock fitted
- Most combos can be locked on foregrip or rear grip
- Clip in insert allows use of very small diameter rod butts
- Overhead reel stays upright
- Heavy duty vertical & horizontal adjustments
- Heavy duty lift & rotate lock gives total flexibility & precise rod direction control
- Rod holder can be quickly removed & fitted to another mount
- Slip resistant universal rail clamp
- UV, salt & oil resistant
- Stainless steel components

No amount of downward force can dislodge the rod.
To remove it, just grab the foregrip and lift inboard while striking at the same time in one smooth action."

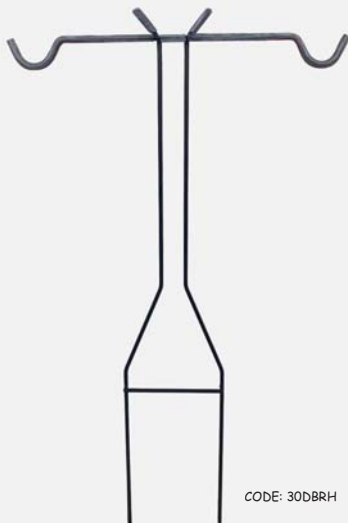

CODE : 23SLRH

GILLIES BANK ROD HOLDER

The Gillies Deluxe Bank Rod Holder is perfect for bank fishing on lakes, streams and rivers, it lets you enjoy relaxing, hands-free fishing. Just insert the spike into the ground and get the holder ready to cradle the rod in less than a minute.
Size: 410mm x 820mm.

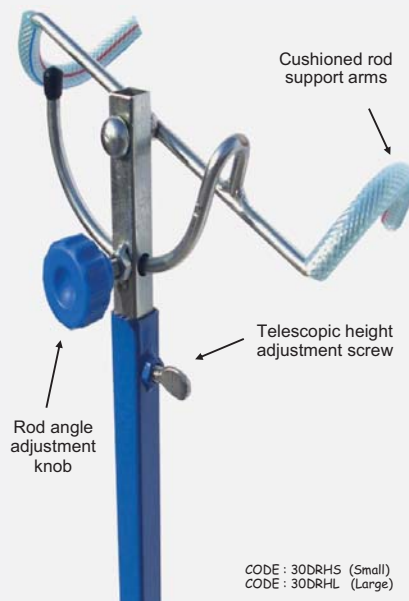

CODE: 30DBRH

GILLIES DELUXE ROD HOLDER

Gillies Deluxe Rod Holders bring a new dimension to the riverbank, lake or shore fishing. These rod holders have the ability to be height adjusted and angled to suit your preferred fishing situation.

WILDFISH FLY PACKS *Selected by Peter Morse*

The Wildfish fly selection packs are perfect for those new to fly fishing and even for some who might be not so new to the sport. There are two groups of packs in the range, freshwater and saltwater. The reality is that there's plenty of overlap. For example the Trout Streamer Pack would very easily be at home in the kit of a bass fisherman, or in fact a fly fisherman just about anywhere around the country. Conversely the Bass Pack contains flies that are just as at home in many tropical freshwater systems right across the north and in the Billabong Pack are flies that would light up the eyes of a bass fisherman. The 3 latest packs to compliment the range are the saltwater models: Flats, Inshore and Barra packs.

All Wildfish Fly Packs have 10 flies per pack that are proven fish takers for that particular application. All flies are hand tied from the Felty's stable.

REDINGTON BEHEMOTH FLY REEL

The Behemoth reel combines the most powerful drag in its class with stunning aesthetics that push the limits of fly reel design. The unique, un-machinable, die-cast construction is coupled with a durable, interlocking, large-arbor spool design that both looks and functions like a premium reel. A super-heavy duty carbon fibre drag package brings the utmost in drag strength, reliability and performance to the family. Sized for your favourite 5-weight trout rod, and all the way up to saltwater ready, big-game sizes.

MODEL SIZE	WEIGHT OZ	REEL DIAMETER	REEL CAPACITY	PRODUCT CODE
5/6	5.7	9CM	125/20	39BEH56
7/8	7.5	10CM	200/20	39BEH78
9/10	10.8	11CM	200/30	39BEH910
11/12	11.4	12CM	250/30	39BEH1112

- Most powerful drag in its class, Adjustable, Carbon Fibre
- Unmachinable, unique die-cast construction
- Large arbor design speeds retrieve and reduces line memory
- Oversized drag knob for easy adjustment
- Easily converts to left or right hand retrieve
- Deep V-Spool for increased backing capacity
- Twin moulded, soft-touch ergonomic handles
- Nylon reel case included and Lifetime warranty

The **5/6 BEHEMOTH** handles 5 and 6 weight applications with the strength to wrangle any fish you can find.

The **7/8 BEHEMOTH** stops everything from bruiser 'bows to blistering bonefish runs with ease.

The **9/10 BEHEMOTH** doesn't bow to the kings like salmon or tarpon--they bow to the BEHEMOTH.

The **11/12 BEHEMOTH**: You name it, this can stop it.

REDINGTON CROSSWATER FLY REEL

The CROSSWATER reels have a unique design and are constructed from durable polymer lightweight material, that make them suitable for anything from trout and panfish up to bass. They're not a wonder of engineering, but they're definitely a solid choice for the angler looking to get started in the world of fly fishing without spending hundreds of dollars. The reels feature a reliable disc-drag system that offers fish-stopping performance with head turning looks.

SAGE MAVERICK FLY ROD

Saltwater angling is more often a game of quick shots than long casts. Dropping a fly in front of a cruising tarpon 20ft off the bow can be the difference between success and failure during a day on the flats. In fact, most saltwater fisheries put a premium on getting the fly to the target quickly and that requires a quick cast into "the zone" for a chance of a high odds at a hookup. The quicker you can lay the fly down, the better the results. Sage's new MAVERICK has been designed to maximize these quick-shot opportunities with a powerful tip section that drives the casting load down to more robust lower sections, making it easier to fire these quick efficient casts and helping the angler make the most of their finite opportunities. With a true saltwater specific backbone and design, the MAVERICK is ready for any salty challenge thrown its way.

MAVERICK SPECIFICATIONS AND FEATURES

ROD MODEL	ROD LINE WEIGHT	ROD LENGTH	ROD WEIGHT	ROD HANDLE	ITEM CODE
690-4	6wt	9ft	3 13/16oz	FULL WELLS WITH EVA FIGHTING BUTT	10M690
790-4	7wt	9ft	3 15/16oz	FULL WELLS WITH EVA FIGHTING BUTT	10M790
890-4	8wt	9ft	4oz	FULL WELLS WITH EVA FIGHTING BUTT	10M890

1090-4	10wt	9ft	4 3/4oz	FULL WELLS WITH EVA FIGHTING BUTT	10M1090

- Konnetic Technology
- Pacific Blue blank color
- Charcoal primary thread wraps with Light Grey trim wraps
- Oversized Fuji ceramic stripper guides
- Oversized hard chromed snake guides and tip-top
- Corrosion resistant anodized aluminum reel seat in Matte Slate
- Integrated "hidden" reel seat hook keeper
- Super grade full-wells cork handle with cork/EVA fighting butt
- Black rod bag with Titanium logo and Blue model tag
- Matte Black powder coated aluminum rod tube with Sage Medallion

SAGE SPECTRUM C FLY REELS

The SPECTRUM C features a large arbor with rugged machined die-cast frame and generous concave vented spool. Equipped with the SPECTRUM Family One Revolution Sealed Carbon Drag and unexpected finishing touches like its fully machined drag knob and handle. The SPECTRUM C gives you more than the fish bargained for.

SPECTRUM C SPECIFICATIONS AND FEATURES

- SCS Drag
- One Revolution Drag Knob with numbered settings
- Large arbor for fast line pick-up
- Vented concave arbor for greater strength and capacity
- Easy conversion from left- to right-hand retrieve
- Neoprene and embroidered ballistic nylon reel case
- Lightweight aluminum die-cast construction with machined finish
- Powder coated for surface protection and corrosion resistance
- Machined and anodized aluminum drag knob and ergonomic handle

RIO NEW SLICKCAST FLY LINES

OUT SHOOT. OUT DRIFT. OUT FISH. What's most tangible about RIO's SlickCast lines is just how slick they are. You'll feel the slickness before you even have a chance to spool it up, you'll love the slickness on your first cast, and you'll be stunned by the slickness after countless days on the water. Whether it's the extra distance that comes with ease, or the extended drag-free drifts, SlickCast lines slip effortlessly through your rod guides. And, as essential slickening agents constantly migrate to the exterior surface, you can trust your SlickCast line to be as slick next season as the day you bought it.

OUT LIVE. OUT WEAR. OUT PERFORM. What isn't tangible about RIO's SlickCast is the durability. You certainly won't appreciate it on Day 1...you'll be too busy drooling over your casts. You'll start to recognize it on Day 25, you'll appreciate it on Day 50, and you'll be blown away by it on Day 80. SlickCast's proprietary formulation is off the charts when tested for abrasion and cracking resistance producing the toughest, most durable fly line coating in the world. You can count on your SlickCast line to outlast every other fly line you have ever fished.

43R19278	WF3F
43R19279	WF4F
43R19280	WF5F
43R19281	WF6F

A long, fine front taper for the lightest of presentations makes this the ideal choice of line when fishing dry flies, nymphs and soft hackles and emerges to tricky eaters.

SLICKCAST

RIO's SlickCast creates the slickest, most durable coating on the market producing the least amount of friction ever measured on a fly line. What does slick get you? For starters, line flies through the guides with higher line speeds for unprecedented and easy distance. The slick coating also allows anglers to fish more effectively as line slides out of the guides with less friction for extended drag-free drifts. Additionally, SlickCast continuously releases essential slickening agents that migrate to the line's surface. This ensures that the line remains as slick as the day it was made giving anglers many years of high performance and easy distance. As for durability, SlickCast's proprietary formulation produces the toughest and most durable fly line coating in the world. Lab tests show that a line built with SlickCast lasts 140% longer than our nearest competitor in abrasion testing and lasts 33% longer when testing a fly line for cracking—that is one tough fly line

MAXFLOAT TIP

Tired of floating lines that sink? Fact is, the reduced coating at the narrow, tapered end of most floating lines doesn't have enough buoyancy to stay above water. MaxFloat Tip Technology floats more than twice as high as regular line tips, without any increase in diameter. That puts maximum floatation right where you need it for reduced drag, longer presentations and quieter pickups.

CONNECTCORE PLUS

Building a better fly line starts at the core, and our low-stretch ConnectCore Plus provides a radical increase in line durability, coating smoothness and overall performance. ConnectCore Plus stretches 30% less than standard cores, and gives anglers all the benefits of a low-stretch core—enhanced sensitivity, less wasted energy and faster hook sets—with a significantly longer lifespan. It also allows hand stretching to easily remove memory coils for a more direct connection to fish and fly. The highest-performing, longest-lasting freshwater lines in the world are built around ConnectCore Plus. ConnectCore Plus is only found on ELITE tier fly lines.

OUT CAST

Out Shoot. Out Drift. Out Fish.

What's most tangible about RIO's SlickCast lines is just how slick they are. You'll feel the slickness before you even have a chance to spool it up, you'll love the slickness on your first cast, and you'll be stunned by the slickness after countless days on the water. Whether it's the extra distance that comes with ease, or the extended drag-free drifts, SlickCast lines slip effortlessly through your rod guides. And, as essential slickening agents constantly migrate to the exterior surface, you can trust your SlickCast line to be as slick next season as the day you bought it.

OUT LAST

Out Live. Out Wear. Out Perform.

What isn't tangible about RIO's SlickCast is the durability. You certainly won't appreciate it on Day 1...you'll be too busy drooling over your casts. You'll start to recognize it on Day 25, you'll appreciate it on Day 50, and you'll be blown away by it on Day 80. SlickCast's proprietary formulation is off the charts when tested for abrasion and cracking resistance—producing the toughest, most durable fly line coating in the world. You can count on your SlickCast line to outlast every other fly line you have ever fished.

The RIO Gold has a revolutionary taper design that gives incredible loop stability at distance, a unique profile that allows the rod to load at close range.

This line is a full size heavier than the industry standard and features more weight distributed towards the front of the line to easily load faster action fly rods.

The short head makes this a particularly good line on smaller rivers and lakes when long distance line control is not necessary and is a great all-round line.

The line has a long head and back taper to increase loop control when carrying long lengths and for making precise casts to rising fish.

RIO SPECIALTY AND SALTWATER FLY LINES

We offer a wide selection of saltwater fly lines for anglers of all abilities in all conditions. Whether fishing flats for bones, perms or poons in the tropics, or heaving big baitfish patterns into the surf for Stripers, we have the right line. A wide selection of both tropical and cold water fly lines ensure that we have every fishing condition and season covered. All saltwater fly lines are built with sophisticated tapers and the latest technology for the modern angler.

DIRECT CORE FLATS PRO

FLOATING	LINE	INTER	LINE
43R20665	WF7F	43R19180	WF8I/I
43R20666	WF8F	43R19181	WF9I/I
43R20667	WF9F	43R19182	WF10I/I
43R20668	WF10F	43R19183	WF11I/I
		43R19184	WF12I/I
SINK TIP			
43R19175	WF8F/I		
43R19176	WF9F/I		
43R19177	WF10F/I		

The DC Flats Pro line has easy annealing, a low-memory core that lays perfectly straight on the water.

DIRECT CORE BONEFISH

FLOATING	LINE
43R21955	WF6F
43R21956	WF7F
43R21957	WF8F
43R21958	WF9F

RIO's DC Bonefish line has a long head and rear taper to smooth out the loop, and to make long efficient casts, while the mid length front taper produces great turnover and easy presentation of typical bonefish flies. Each line is extremely easy to stretch and lies perfectly straight on the water, yet retains the stiffness needed to cast in hot conditions.

DIRECT CORE PERMIT

FLOATING	LINE
43R21583	WF8F
43R21584	WF9F
43R21585	WF10F

RIO'S DC Permit line features an easy casting taper that loads at close range, and a long back taper for fast, 2nd shot casts. The front taper and weight distribution is designed to give soft presentations so as not to spook wary Perms, while maintaining enough weight to easily cast typical crab patterns.

DIRECT CORE JUNGLE SERIES

FLOAT	LINE	SINK TIP	SAND	SINK TIP	BLUE
43R19100	WF7F	43R19111	WF8F/S6	43R19105	WF8F/I

43R19102	WF9F	43R19113	WF10F/S6	43R19107	WF10F/I
43R19103	WF10F				

RIO's Jungle series of fly lines are designed to withstand the heat of tropical and jungle destinations. Each line has a short, quick-loading head that will easily cast and turnover typical large flies, and a range of density options ensures anglers are covered for all species, conditions and waters.

TROPICAL OUTBOUND SHORT

43R20543	350GR	43R20538	700GR
43R20542	400GR		

RIO's Leviathan lines have been specifically designed for the largest of tropical species.

INTER	LINE
43R21028	500GR

TROPICAL GT

FLOATING	LINE
43R21985	400GR
43R21986	475GR
43R21987	550GR

RIO's GT line has been specifically designed for the demanding conditions faced by the hardcore GT angler.

RIO IN TOUCH SERIES FLY LINES

The In Touch series of fly lines utilise a new core material Rio calls Connect Core. This stiffer core material results in several fly fishing benefits. The first is much less stretch in your fly line. Less stretch adds more durability. Creating better casting performance because the timing of casts is unaffected by fly line stretch. The fly line becomes more responsive making for more precise mends and fast line pick up. Ideally your fly rod should flex and load rather than your fly line stretching and negatively impacting the entire system. Perhaps one the most important benefits is a fly line that is ultimately more sensitive. Line stretch is the enemy of sure, immediate reaction and positive hook sets. Connect Core results in faster, more effective hook sets and more strength and response while playing fish.

INTOUCH OUTBOUND SHORT

FLOATING	LINE	SINK TIP	LINE
43R21224	WF5F	43R21306	WF5F/I
43R21301	WF6F	43R21307	WF6F/I

43R20435	WF8I		

A fantastic range of sub surface fly lines, designed for the lake angler. Powerful front loaded head for easy casting.

RIO FLY LINES AND ACCESSORIES

Fly lines often get overlooked as a crucial piece of fly fishing gear. When a fly line is not matched well with even a top shelf fly rod that can set you back a thousand bucks, performance will bottom out. Nevertheless, a high quality fly line can make a cheap fly rod cast like a dream. Rio has been building some of the best fly lines in the industry for a long time and have a fantastic selection of the highest quality freshwater fly lines, designed to optimise your time on the water. All of our fly lines are designed to excel at required casting and fishing needs and feature cutting-edge technology for maximum versatility and performance. Make the cast of your dreams with RIO's freshwater fly lines.

For the full RIO fly line range, visit: www.rioproducts.com

EURO NYMPH LINES

FLOATING	LINE
43R20174	#2-#5

One size fits all: #2-5, Ultra-thin, incredibly light line for the utmost in sensitivity. Highly visible tip for detecting the subtlest of takes, Approved & endorsed by FIPS Mouche as 'Competition Legal', Low-stretch core

SPECIALTY LIGHT LINE

FLOATING	LINE	FLOATING	LINE
43R20478	WF2F	43R20483	DT2F
43R20479	WF3F	43R20484	DT3F

43R20764	WF11F
43R20765	WF12F

Slightly heavier, easy casting lines for a multitude of situations. Short powerful front taper for good presentation. Each saltwater line is built with a hard, saltwater coating for the best in performance.

AGENTX DRESSING

AgentX Line Dressing is specifically formulated to enhance the performance of all modern fly lines. Treated lines will cast further, remain clean longer and float higher than untreated lines.

Code: 43R26079

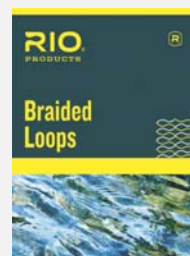

FLY LINE CLEANING KIT

Complete with four Wonder cloths and a 1 oz bottle of AgentX line dressing

Code: 43R26075

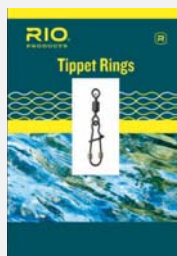

BRAIDED LOOPS

A quick and easy way to attach leader to fly line or the backing to the line.

CODE	SIZE
43R26081	7-12wt
43R26082	3-6wt
43R26083	8wt SPEY

TIPPET RINGS

RIO Tippet rings are small, very strong lightweight, and make rigging and tippet replacement fast and easy.

CODE	SIZE
43R26032	2mm
43R26033	3mm

TIPPET HOLDER

The Headgate tippet holder is made from anodized aerospace aluminium with a built-in, replaceable line cutter.

Comes loaded with five RIO Powerflex tippet spools

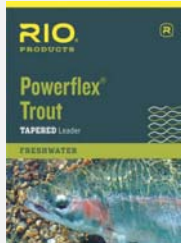

Code: 43R26056

RIO TAPERED LEADERS AND TIPPET MATERIAL

We have an incredible offering of the highest quality tippet material and tapered leaders for the freshwater and saltwater fly fisher, each with their own formulation, taper design and material choice to ensure that the leader does exactly what it was designed to do - cast after cast, after cast. Whether you are fly fishing for Trout, Bonefish, Permit, Tarpon, Strippers or even toothy critters, you will find RIO has the right leader and tippet material for you. .

For the full RIO tapered leaders and tippet range, visit: www.rioproducts.com

43R24414	1X	15
43R24415	0X	18

RIO's Powerflex Plus, is made with VHT Technology, which results in the strongest Trout leader ever made.

BONEFISH LEADERS

10 FT	LB
43R24261	8.8
43R24262	10
43R24263	13.2
12 FT	LB
43R24276	8
43R24277	10
43R24278	12

RIO's Bonefish Leaders have a powerful taper design that easily turn over typical bonefish flies.

SALTWATER LEADERS

10 FT	LB
43R24281	8.8
43R24285	10
43R24282	12
43R24283	17.6
43R24284	20

RIO's Saltwater leaders are an excellent general purpose saltwater leader for a multitude of species.

POWERFLEX TIPPET

30 YDS	SIZE	LB
43R22001	7X	2.4
43R22002	6X	3.4
43R22003	5X	5
43R22004	4X	6.4
43R22005	3X	8.2
43R22006	2X	10
43R22007	1X	13
43R22008	0X	15

RIO Powerflex Tippet is a high knot strength copolymer nylon tippet that features superb knot strength, stretch and suppleness to make this an excellent nylon tippet material for almost all trout fly fishing needs. It is a light grey color to enhance its camouflage ability on the water.

FLUOROFLEX PLUS

30 YDS	SIZE	LB
43R22307	7X	2.5
43R22306	6X	3.6
43R22305	5X	5
43R22304	4X	7
43R22303	3X	8.5
43R22302	2X	12
43R22301	1X	13
43R22300	0X	15

Nearly invisible to fish, Fluoroflex Plus Tippet is an ultra strong, incredibly supple fluorocarbon with excellent knot strength - even to nylon tippet and leaders. Made from the thinnest fluorocarbon on the market, Fluoroflex Plus' strength makes for great trout material.

POWERFLEX PLUS TIPPET

50 YDS	SIZE	LB
43R22031	7X	2.5
43R22032	6X	4
43R22033	5X	6
43R22034	4X	7.5
43R22035	3X	9.5
43R22036	2X	12

RIO'S Powerflex Plus Tippet is the strongest nylon tippet material ever made, with tensile strengths up to 20% more than regular tippet. A highly technical formulation of the nylon copolymer manufacturing process has resulted in this prodigious strength increase, without compromising knot strength or suppleness.

FLUOROFLEX FRESHWATER

30 YDS	SIZE	LB
43R22113	7X	2
43R22114	6X	3
43R22115	5X	4
43R22116	4X	5
43R22117	3X	6
43R22118	2X	8
43R22119	1X	10
43R22120	0X	12

Fluoroflex Freshwater Tippet is a medium stiff, 100% fluorocarbon tippet material and is ideal for Steelhead, Salmon, Trout and Bass, and for casting larger flies. Clear in color, this freshwater tippet is nearly invisible to fish.

SUPPLEFLEX TIPPET

30 YDS	SIZE	LB
43R22040	7X	2
43R22041	6X	3
43R22042	5X	4.7
43R22043	4X	6.1

The RIO Suppleflex Tippet is incredibly strong, with excellent knot strength and, as its name suggests, unbelievably soft and supple. A featherweight presentation does not impede the natural movement of a fly in the current, the Suppleflex is the perfect choice for the trout angler fishing with smaller flies.

FLUOROFLEX SALTWATER

30 YDS	LB
43R22100	8
43R22101	10
43R22102	12
25 YDS	
43R22103	16
43R22104	20
20 YDS	
43R22105	25

RIO's Fluoroflex Saltwater Tippet is medium stiff and made from 100% fluorocarbon material. A tough saltwater tippet, the Fluoroflex is abrasion resistant, super strong, and easy to knot. Great for casting the largest of flies and in tough winds, this tippet is perfect for all saltwater species.

HARD MONO SALTWATER

30 YDS	LB
43R22421	8
43R22422	10
43R22423	12
43R22424	16
43R22425	20
43R22426	25
43R22427	30

RIO's Hard Mono Saltwater tippet is a very stiff, super abrasion-resistant nylon tippet material. Ideal for casting the largest flies and in tough winds to get the very best turnover.
