

2021 - 2022
FISHING TACKLE CATALOGUE

ABOUT J.M.GILLIES

NEW

It was over 93 years ago when John Malcolm Gillies began servicing the fishing tackle industry to satisfy the needs of the fishing public with local hand tied trout flies. From those humble beginnings J.M.Gillies evolved and began to distribute fly fishing tackle before it moved into general fishing tackle, firearms and other sporting goods. With over 93 years of service to the fishing tackle industry, J.M.Gillies continue to offer the highest quality, innovative and most sought after brands of fishing tackle in Australia today and we are still proud to be 100% Australian owned. Please see our exciting new season gear below.

BLUEWATER

BLUEWATER

BLUEWATER BULLET BAIT

NEW SIZES

Bluewater Bullet Bait lures are built tough to take on the most ferocious predators when targeting Bluewater species such as GTs, Tuna and Tarpon etc. The 3 new sizes are sure to fill the needs for anglers to target an even wider range of species. The Bullet Bait is hand made and handcrafted using a super clear resin and features a heavy duty wired through construction. It is rigged with a VMC 7266 5/0 hook and a stainless steel heavy duty split ring and is now available in 4 sizes and 5 colours.

BLUEWATER SAURY

The Saury lure is designed to mimic the popular pelagic baitfish and will be in its element chasing Tuna, Mackerel and all other predatory species. The Saury comes with a 8/0 VMC single hook on the front, a 9/0 single on the rear, with heavy duty rings and hardware. The heavy duty, stainless steel, wired through construction ensures the lure will stand up to the toughest sports fish. The reinforced bib design compliments the nose wired tow point to ensure the lures swim perfectly out of the box and require minimal tuning after use.

230	108	5mt/15ft	F 8/0-R 9/0	WOBBLE	03CBS23 ..

LIVEGLO Fluorescent Technology
incorporating luminous, fluorescent and
ultraviolet additives for maximum impact.

The Saury is available in 10 colours and some of those feature the patented "LIVEGLO" fluorescent technology. The technology incorporates luminous and ultra violet additives that are somewhat invisible to the human eye but not to predatory fish. The innovation and design in Lance Butler's lures is something that sets his lures apart from most mainstream lures. Enjoy using these quality Australian designed lures.

BLUEWATER MINNOW

NEW MODEL

The all new Bluewater Minnow has been developed with the toughest of Bluewater species in mind. With many conventional lures the action can quickly become untuned with knocks and bumps but this new in-mould bib and body will ensure the lure will track true and straight time and time again without the need for adjustment. The new design also allows for exceptional speed to chase the fastest pelagic species with it comfortably holding in at 8 knots.

The Ghost mould innovation feature colours and designs never seen before in Bluewater lures, these colours will mirror the most predominant baitfish across both the Pacific and Indian Oceans as well as some more wild and unpredictable colours that will entice the toughest predatory fish.

BLUEWATER MINNOW STD SERIES

COLOUR RANGE

BLUEWATER MINNOW PRO SERIES

The Pro Series range of Bluewater Minnow lure colours, feature an abalone shell foil and laser insert, that makes for a realistic finish that has proven very effective on all pelagic species.

COLOUR RANGE

BLUEWATER TROLLING SKIRT

The Bluewater Trolling Skirts feature unique hand poured heads attractive graphics and finish detailing our trademark Bluewater logo in the eye, supple silicone skirt, quality finish to the resin head and skirt attachment, two different swimming actions, tried and tested fish catching colour combinations.

The 6", 8", and 10" Bluewater lures are considered small to medium in size and ideally would perform better if rigged with a single hook. The 8" and 10" version could accommodate a two hook shackle rig, however, if the gauge of the hook is heavy this could dampen the action of the lure. It is recommended that chafe tube is used over the leader through the lure head to avoid abrasion, and a stopper used above the rigging inside the lure skirt to stop the rigging pressing against the head at the point of connection.

Target species: Billfish, Marlin and Sailfish, as well as other pelagic species including Yellowfin, Bluefin Tuna, Wahoo, Spanish Mackerel and Dolphinfin.

BLUEWATER KNIFE

The Bluewater Knife Range features a superior German stainless steel mid-flex blade, non stick coating on blade, soft TPR non slip handle and includes a webbing sheath.

Bluewater Knife: 18cm Code: 03CBK18

Bluewater Knife: 20cm Code: 03CBK20

KNIFE SHARPENER

The Bluewater Knife Sharpener is a compact design knife sharpener with a two stage sharpening system. It features both ceramic, tungsten and a diamond stone on the top section. The sharpener also has a suction pad base that allows you to secure it incredibly firmly to any clean flat surface. Measuring in at only 68mm, it takes up barely any space and is the perfect addition to your tackle box.

The Bluewater Speed Plugs are constructed from a hard polyurethane material, are keel weighted in the front for casting, have a luminous ball in the body section and feature a rubber hook lock that secures the rig.

COLOUR RANGE

BLUEWATER ROCKET POPPER

LENGTH MM	WEIGHT GMS	DIVING DEPTH	ITEM CODE
163	68	SURFACE	03CBP163...

The Bluewater P163 Rocket Popper is an extremely versatile lure that can be fished in a number of different ways. The P163 features a special tail-bias weighting system that serves two main purposes. The heavy tail weight causes the lure to fly straight and true through the air - meaning the P163 casts like a rocket. The tail weighting also causes the lure to sit nose-up in the water during the retrieve. This nose-up position causes the lure to literally skip and dart along the surface during a straight, high-speed retrieve; perfectly imitating a fleeing Garfish or Saury. The P163 can also be fished with a slow, jerking motion which will see it swim with a "walk the dog" action, much like a Stickbait. Ideal for all bluewater casting, and will appeal to all large pelagic species.

COLOUR RANGE

TASMANIAN DEVIL®

TASSIE DEVIL

LEAD FREE TASMANIAN DEVIL LURES

Tassie Devil have developed the new lead free Tassie Devil to satisfy the demands of various countries and waterways around the world that have prohibited lead based lures.

Initially the lead free model will only be done in a small and selected colour range for the Australian market as we don't have the same requirements as other parts of the world. From the naked eye the lure will appear and swim exactly like the original model but at the core is a very sophisticated balance of materials that are more environmentally friendly.

TASMANIAN DEVIL®**NEW***Due December 2021*

LEAD FREE

In many parts of the world, lead is being phased out in Public waterways.

"We want to ensure future generations can continue to use this iconic Australian lure."

LEAD FREE TASMANIAN DEVIL

TASMANIAN DEVIL LURES

Tasmanian Devil lures are a unique Australian product designed for trolling, casting or jigging in fresh and saltwater. The lure action is due to the revolutionary winged technology that causes the lure to swim in an irregular manner, darting and diving, simulating the movement of wounded fish. This pulsating action is transmitted to the rod tip that will show as a "nodding action" that is proof that the lure is swimming correctly. If this rod tip action is not present, either a piece of weed, or a fish is on the hook. Regardless of the species that is targeted, the Tasmanian Devil qualifies as an all round lure. Effortless to cast, simple to troll and easy to jig.

RIGGING: 7gm-13.5gm-26gm

Thread the line through the lure and then either; tie to split ring attached to a hook or thread through a bead and tie to directly to hook. **RIGGING: 20gm** With Dual tow points the 20gm allow the lure to be fished at different depths. Running the line (a) will see the lure swim at 2.2 m. Running the line through the special tow point on the back of the lure (b) will make the lure dive to 3.3 m.

Ultra Violet
Paint

TROLLING AND RETRIEVE SPEED

The best way to gauge the correct speed of the lure when trolling or cast and retrieving is to watch the rod tip. The tip of the rod should be nodding, or pulsing with the lure as it moves through the water with its uniquely irresistible action.

TASMANIAN DEVIL BLADE

The Tasmanian Devil 'Devil Blade' features a uniquely designed spinner blade which has been created to match the famous Tasmanian Devil lure. The blade provides a distinct action as it spins through the water. Custom Tasmanian Devil paint designs that have been created specifically for freshwater species. Each lure is equipped with quality terminal tackle and VMC treble hooks.

LENGTH MM	WEIGHT GMS	SWIMMING ACTION	ITEM CODE

30	5.4	Spinning	18BL54..

COLOUR RANGE

TASMANIAN DEVIL SPOON

The Tasmanian Devil 'Devil Spoon' lure offers dual attraction of vibration and flash. As the spoon travels through the water it flutters from side to side and emits a vibration that attracts fish even in cloudy water. The polished under side of the Devil Spoon produces a flash attraction, ideal in clear running water and is a proven trigger for predatory species.

TASMANIAN DEVIL MONO LINE

The Tasmanian Devil Mono range of lines are supple and are processed with real camouflage effect that imitates silt and plankton floating in water; moreover, the brownish 3D captures natural essence of chameleon. When you have the line above water, fluorescent glitter helps you trace its direction easily, but the part in the water where light penetration becomes less, the line turns brown with less reflection. This unique line has excellent knot strength and the coil memory and shock-resistant performance is improved making it suitable as reel mainline and as leader.

TASMANIAN DEVIL LEADCORE LINE

Tasmanian Devil Leadcore is an innovative line that allows a lure or fly to be trolled at varying depths without the aid of a paravane or trolling sinkers. The leadcore trolling line is constructed from tightly braided nylon multi-filament woven over a core of pure lead resulting in a fine diameter line with high visibility colour metering every 10 yards. The colour metering makes it easy to monitor the depth being fished.

GORILLA GRIP

GRIP
~~SLIPPERY~~
WHEN WET

GORILLA GRIP

For many fishing applications, to light tasks and heavy-duty work, the Gorilla Grip patented gloves are the go-to choice for anglers and the handyman alike. With maximum durability, dexterity and a trusted never-slip grip, Gorilla Grip guarantees superior grip every time. Gorilla Grip gloves are constructed of nylon and dipped with a specialised coating to keep hands protected no matter the application, wet, dry or oily.

GLOVE FEATURES

A: Formfitting design B: Breathable nylon shell C: Fitted elastic cuff D: Patented non slip technology E: Stain resistant finish

PATENTED TECHNOLOGY

The patented technology draws moisture to the surface of the glove where it quickly evaporates, or is transferred back to the inner layers of the glove. This aids in providing maximum grip during both wet and dry applications.

Gorilla Grip is a lightweight, breathable and high dexterity multi-purpose glove with a patented grip coating that provides a maximum grip under any conditions.

GLOVES

GORILLA GRIP MAX FINGERLESS

The Gorilla Grip Max Fingerless gloves allows for maximum dexterity, comfort and performance. Another feature of these gloves is the extended cuff that protect from the sun. The gloves have a breathable light knit shell is skin tight and quick drying and feature the patented Gorilla Grip Technology that provides maximum grip in dry, wet and oily conditions.

GORILLA GRIP 3/4 DIP INSULATED

The Gorilla Grip 3/4 Dip Insulated gloves feature an insulated liner for cold weather and fish cleaning use. The 3/4 dip keeps hand dry and the breathable light knit shell is skin tight and quick drying. These gloves also feature the patented Gorilla Grip Technology that provides maximum grip in dry, wet and oily conditions.

ORIGINAL GORILLA GRIP GLOVE

From light chores to heavy-duty projects, the Original Gorilla Grip glove is specialised for maximum durability, dexterity and hand protection. These lightweight gloves allow your hands to breathe during tough tasks while maintaining an unmatched grip. Perfect for any handyman projects and fishing needs.

VEIL GLOVE

The Veil Gloves are a must have for any tackle box. They're lightweight, maintain a grip in the wettest conditions and fit like a second skin that protects hands from the sun. The proprietary polymer technology on the palm pulls moisture away from the surface and provides maximum grip in wet and oily conditions and the Veil gloves also features the exclusive Veil camo.

A5 CUT GLOVE

On the boat or at the cleaning station, Gorilla Grip A5 Cut gloves are a must for every tackle box. This glove features a highly breathable, flexible design with an ANSI level 5 industrial cut protection rating featuring proprietary polymer technology on the palm that pulls moisture away from the surface and provides maximum grip in wet and oily conditions.

RHINOFLEX A5 CUT GLOVE

The Rhinoflex glove is highly-breathable and fits like a second skin allowing for natural movement and dexterity. The tough-but flexible polymer shell delivers maximum impact and abrasion protection. The glove features the ANSI level 5 industrial cut protection rating and the propriety polymer technology on the palm pulls moisture away from the surface and provides maximum grip in wet and oily conditions.

FINS BRAID

FINS FIGHTER PRT BRAID

Fins Fighter PRT Braid incorporates technological advancements not seen in other braids, tightly braided 4 end multi filaments of 100% Spectra fibre with applied resin infusion resulting in a rounder profile with high abrasion resistance, firm feel without stiffness allowing for good castability and locked in colour. Available in a variety of spool sizes, this high performance, high strength durable braid is ideally suited for most fishing applications and is ideal for all tough and predatory fish.

FINS ORIGINAL PRT BRAID

PRT is a soft, flexible braid with a very tough urethane coating, a great choice for finesse fishing. Flipping and pitching into heavy structure where durability and strength are paramount, is one of the many situations where PRT shines. PRT is the current state of the art braid produced using traditional braid architecture, 30 pound PRT is the diameter of 8 pound monofilament, 20 pound like 6 pound mono, etc. Many experienced braid users find PRT to their liking as it has a familiar feel but with a durability that exceeds their expectations regarding colour retention and fray resistance.

FINS ORIGINAL PRT MULTI COLOUR BRAID

The world famous Fins Original PRT Braid is also available in multi colour. This allows you to know the exact depth you are fishing, as the line changes colour every 8yds/25ft.

FINS Metered coloured Braid, is marked with a repeating pattern of 4 colours, to allow the angler to know exactly how much of the line is off the reel. The line has 25ft colour segments of Yellow, Green, Orange and Blue with a 1ft white mark in the centre of each segment. MCB is 4 end braid with a soft "hand" and no gummy coating or colour transfer.

FINS BRAID

FINS 40G COMPOSITE SUPERLINE

At FINS we're very proud of our 40G Composite Superline. For more than 20 years we have brought you consistently high quality braided fishing lines. It is hard to describe in words how superior FINS 40G is relative to all other braids on the market. All the adjectives have been used and mostly overstated, and let's face it every box you pick up claims to be the best. We can honestly say that FINS 40G unique composite structure gives it a smooth mono like feel but it's a durable braid with the smallest diameter to strength ratio ever offered. **Colour:** Chartreuse **Lengths:** 150 / 300 / 1500yd spools.

85	12	0.014	0.356	98.0	44.5

FREQUENTLY ASKED QUESTIONS ABOUT 40G

Why does 40G come in unusual package tensiles? We wanted to highlight how different 40G is compared to existing braids. As an example, most braids that are equivalent to a 6lb mono are labelled 20lb, 40G is 45lb. Also our "full disclosure" front label gives you the average break without a knot, as well as diameters in English and metric units.

What makes this line feel so smooth? FINS 40G is made with a unique process; we start with a core of SPECTRA fiber and then over-braid this tightly with 8 ends of smaller yarns.

Why does this line cost more? Smaller yarns generally cost more and the 40G's unique processing is also slower than typical braiding which is why it has such an excellent feel.

Does this line hold up well? Our pro-staff anglers report at least twice the wear as standard braids. When 40G is close to wearing out you have an advance warning as the over-braid will show damage before the core.

Will this line hold it's colour? The colour will last as long as the product, due to the colour being applied to the core fibers. 40G gets darker when wet and lighter when dry.

What knot do you recommend? We recommend the Palomar for terminal attachments, and a double uni-knot when attaching to a leader, but giving an extra wrap is always a good idea with super slick FINS 40G.

FINS EVOLVE

Fins 'Evolve' is constructed from a next generation Hybrid Fibre Concept (HFC). It has been formulated and designed for the tough Australian conditions. State of the art fibres combine to provide maximum casting distance, ultra smooth presentation and yet still meets all the toughness and reliability that you come to expect from Fins lines. Ultra-thin diameters combine with silky smooth outer coatings to provide the softest and most efficient casting line on the market. The round profile suits both spin and bait casting reels and is available in hi-vis Chartreuse for all water visibility.

MAXIMA

MAXIMA LINE

ULTRAGREEN

MAXIMA

Though often attempted, no other manufacturer has duplicated the exclusive colour and characteristics of Maxima Ultragreen. This line becomes virtually invisible under water, particularly in freshwater and inshore coastal waters. Ultragreen is also soft and limp, yet retains Maxima's legendary tough, high durability finish for excellent abrasion resistance. Ultragreen is the best all-around line for a variety of freshwater and general saltwater fishing. Spools and casts well on spinning, baitcasting and larger conventional reels. Ultragreen's invisibility under water also makes it ideal for leader material.

LEADERS & FLUOROCARBON

MAXIMA

The suppleness of on the tippet section on Maxima's Ultragreen tapered leaders, allows the fly to move naturally and appear real on the water. The stiffness of Maxima Chameleon monofilament butt allows the leader to roll over freely and lay out more smoothly. This highly effective, blended product is a Maxima exclusive. Maxima Leader Wheels are handy dispensers that conveniently fit into any box or fishing vest. Thanks to a special blend of non-flash components, Maxima's Fluorocarbon has the ability to become virtually invisible to fish. Unlike standard fluorocarbon lines, Maxima's Fluorocarbon is extremely sensitive and strong.

TUNA BLUE

MAXIMA

The offshore fishing environment is no place for the weak of heart, or weak line. With many species pushing the 1,000-pound mark, strength and durability are paramount. Tuna Blue incorporates the proven characteristics of extreme tensile power to land world-class catches, a molecular structure that delivers the industry's toughest shock resistance. And superb abrasion resistance to protect from razor-sharp teeth.

TOURNAMENT - IGFA MAXIMA

One of the key features of Maxima's IGFA Tournament Fishing Line is its durability and overall resistance to both the punishment from saltwater as well as bigger fishes. Since this particular line is designed to hold its own against the rigors of the most challenging of fishes, it delivers solid performances within its own weight class. Tested for both regular angling and tournament fishing, this line follows the International Game Fishing Association requirements to perfection.

ASARI LURE AID

The Asari Lure Aid could be the best investment you ever make as it is designed to go down your line, amongst the snags and catch onto your lure so that you can free it. Because you have this device, you won't be too worried about fishing those snag ridden areas where the fish are most likely to be.

Available in 2 sizes: 125 & 250gm

CODE: 32ALA125
CODE: 32ALA250

VERTICAL ROD RACK

The Vertical Rod Rack is designed in Australia and is moulded from high impact plastic that will not splinter or rot. Each Rod Rack can hold up to 6 rods and it will not tip over. It can be fixed to the wall with 4 screws included.

Twin Packs

Unit - W:44cms x H:54cms

CODE: 19SEAD2

HORIZONTAL ROD RACK

Securely store any rod type with the reel still on. This rack maximizes the capacity of your storage area and it is great for over door-ways. The rod rack is a durable one piece design that fixes easily to the wall, also it keeps the rods out of reach of children.

2 Pack

2 Racks per pack, can hold up to 3 rods

6 Pack

6 Racks per pack, can hold up to 9 rods

CODE: 19S2

CODE: 19S6

BERLEY BASKET

The SEADOG berley basket is very functional and easy to use. The basket is surrounded by 8mm holes which allow an even flow of berley, has a positive locking lid, comes supplied with 1.5 metres of rope and can accommodate different weights to suit varying tidal conditions, as well all sorts of berley; dry, wet or frozen.

Secure rope attachment

BERLEY BASKET SMALL

- Easy access, flip open lid
- 210mm long x 170mm diameter
- Can disassemble to store flat
- 4 Litre capacity CODE:19SBPS

BERLEY BASKET LARGE

- Easy access, flip open lid
- 420mm long x 170mm diameter
- Can disassemble to store flat
- 9 Litre capacity CODE:19SBPL

2DEADLY

Scan
for
lure
action

The innovative 2Deadly is one of Lance Butler's most successful designs, and certainly one of his all-time favourites. Thanks to it's unique design and profile, this creative lure can be fished as both a surface popper and a shallow diver in the same retrieve. The 2Deadly gives anglers the best of both worlds; with the splash and sound of a popper, and the flash and vibration of a diver.

LURES

SPEED CLIPS

NORMAN LURES - SPEED CLIPS

Think of Speed Clips as split rings that open. After tying your line to a Speed Clip, squeeze the arms together to open the jaw, then slip one arm completely through the eyelet of your lure until the jaw can freely close. The Speed Clip should move freely on the lure's eyelet. Made of stainless steel, Speed Clips can be used in fresh and saltwater.

25mm/23kgs Code: 82NMSKMG5

Norman Speed Clip 10pk
5mm/10kg Code: 82NMSK1

WARLOCK MOTH

The Warlock range of top water Moth lures are uniquely designed and are constructed from tough ABS plastic. Unmatched in attraction and originality, the Moth provides a one-of-a-kind top water presence that fish cannot resist. The Moth is fitted with wings that flap and create a noticeable splash and a unique sound that is proven to trigger aggressive strikes. Designed to mimic a struggling insect on the water surface, the Moth is capable of drawing heart-stopping strikes day or night. Hand painted finishes with extra strong VMC Spark Point hooks that allow you to target your favourite species with ease.

WARLOCK HARDBAITS

The Warlock range of lures are one of the most unique hard-baits currently available on the market. The key feature of the Warlock series profile is our signature S.A.P.™ or Sonic-Amplifying-Panels that are moulded into the underside of the lure's flanks. These scalloped panels reflect ultra-strong micro-vibrations that create an irresistible sonic footprint that is unlike any other hardbait on today's market. This series swims with a tight, rolling action and unsurpassed cycle rate, sending out a strong signal that triggers an instant strike instinct in any nearby predators. Quite simply, the Warlock is unlike any hardbait you've ever used before - the fish just won't know what's hit them when you unleash the Warlock series on your local waterway.

WARLOCK 52 3PKS

Each Warlock 52 3pk contains the 3 most popular colours. The 2+mt dive depth will suit most applications.

STUMPJUMPER LURES

Born on the Victorian banks of the mighty Murray River in 1986. The first wooden StumpJumpers fitted the local cod fishing environment perfectly. They dug down deep, had great buoyancy to help them jump over the stumps (hence the name) and were as tough as nails. By 1991, freshwater fishing was a boom industry in this country and there was an almost insatiable demand for cod lures. The only way to satisfy it was to swap from the traditional wooden bodies to plastic. In recent times, the demand far outstripped supply and subsequently the lures are now being manufactured offshore. With the change to plastic, there was also an opportunity to introduce what is still about the world's only truly successful interchangeable bib system.

As unlikely as it sounds, it's an idea that really works. With the deep diving bib, the No.1 StumpJumper is a great cod lure, but switch to the pointy, shallow running bib and you have a minnow lure capable of taking saltwater speedsters like Mackerel and Tuna or even Barramundi, not many other lures can do that!

REMOVABLE BIB SYSTEM

The proven swimming action and unbelievable anti-snag capabilities of the StumpJumper are combined with an exclusive patented snap-lock bib that lets you instantly alter the lures action and characteristics by changing to different shaped bibs. With a choice of hot colours and flashing metallic finishes and subtle patterns, you can change the colours of the bibs to get the attention of the fish. Mix and match lure bibs and bodies in a system that makes StumpJumper the most innovative and effective lures available today.

To change curved bibs bend down and pull out.

Flat bibs pull straight out.

AVOIDING SNAGS

The name StumpJumper is synonymous with the key benefit of the design of this lure. Used correctly it will help you avoid the frustration of being snagged. Here's how; when trolling, hold the tip close to the water and at a 90 degree angle out from the boat to allow the current and the in-built buoyancy of the lure to lift and clear the snag. With practice, the lure can be walked through most snags. Vary the length of line to stay in touch with the bottom. Bump the odd log and you know you are down there with the fish.

JJ's StumpJumper

What's old is new again “Coming December 2021

The Cod anglers love affair with timber lures has been bought back to life in these limited run, Retro Stumpjumper.

Cod Fishing guru Rod Mackenzie has selected these original colours based on his vast experience fishing waterways all over the country for Murray Cod.

- Timber provides a superb finish and a buoyancy that cannot be replicated in plastic moulded lures.
- These limited run size 1 timber Stumpjumper come with a fixed, single deep diving bib.
- 3X VMC Hooks

STUMPJUMPER MEGA

The big brother to the StumpJumper series of lures is the Mega StumpJumper. This specialty lure is a serious lure for those chasing fish at specific depths. With the quality of technology evolving with side scan and almost TV quality pictures in sounders this lure allows anglers to hit specific depths with ease and slow troll in the strike zone for longer and better results. A patented removable bib system gives anglers every advantage now rather than relying on the fish to be over active and chasing a lure at a depth that the fish aren't.

JJ's StumpJumper

COVERT SERIES

The Booyah night time Covert Series spinnerbaits are the ideal option for night time fishing. The unique head design is modified from a traditional Booyah spinnerbait head with a raked out gill, which offsets the blade torque to keep the bait running true. Featuring black and red skirt colours, as well as a high-quality Hildebrandt blade, this spinnerbait is truly a game changer for the angler looking for an edge once the sun goes down. Available in two colours and two sizes.

POND MAGIC REAL CRAW

The Pond Magic Real Craw creates a totally different look while retaining the fish-catching action and vibration of a spinnerbait. Mustad Ultra Point hook and 60-strand ultra fine silicone skirts.

WEIGHT OZ	HOOK SIZE	COLORADO BLADE	ITEM CODE
1/8	1/0	#1.5	73MPM...

MICRO POND MAGIC

The Micro Pond Magic is tough, durable and catches fish in big lakes as well as ponds and streams. The 1/8oz spinnerbait features a true-running "R" bend wire for incredible vibration and a single Colorado blade that provides the perfect amount of flash and water displacement.

JITTERBUG

Well respected as THE top water lure for night fishing, the Jitterbug has proven its power to ignite explosive strikes throughout the day. Fred Arbogast's Jitterbug was first introduced in 1937. The Jitterbug has a double-cupped lip, placed at precisely the correct angle, produces the loud, rhythmic, surface busting sound that is proven to be irresistible to every surface known feeding fish. The new colours to the range will only serve to further entice your target species into a feeding frenzy.

YAKIMA FLATFISH

FlatFish® is a shallow diving plug that produces high action and vibration that attracts fish and produce a wide, strike-producing wiggle when trolled or reeled at slow speed. For best result, tie your line directly to the round-eyed connector snap or figure-eight eyelet provided with the lure. A barrel swivel can relieve line twist associated with spinning reel use and should be placed a few feet ahead of your plug.

LENGTH MM	WEIGHT GMS	WEIGHT OZ	DEPTH SPIN	DEPTH TROLL	PRODUCT CODE
119	20.27	3/4	12-14FT	27FT	06B24A...

The NEW Bandit Generator Deep Walleye is an innovation to the deep diving minnow crankbait that has proven to catch fish! The Generator Chrome Series features two glow stick insertion points, one in the head and one in the tail of the bait that ensures that fish will find the bait in dirty or nighttime conditions. This added light source calls out to gamefish at extraordinary distances, creating irresistible flash and glow that triggers massive strikes. Body measures 4-3/4" and weighs 5/8-ounce. Hooked with 3 sharp black nickel trebles. Includes 2 pairs of glow sticks (10hr glow each) along with a tool to remove them.

COLOURS AVAILABLE

Replacement glow sticks 4pk.

BOMBER LONG A

Bomber's original Long A design is one of the most effective jerkbaits on the market, and is arguably Australia's most popular Barra lure of all-time. Available in 5 different sizes to cover a wide variety of applications, as well as 2 deep diving models to get down to those deeper holding fish.

The most popular "all-rounder" is the B15A size - when people talk about the mighty "Gold Bomber", this is the size that they are referring too. The 13A is perfect for Jacks, Barra, Salmon and Trout and the 14A is a great choice for Barra in billabongs and small creeks, and is also a Mangrove Jack killer! The larger BSW16A & BSW17A sizes are the preferred choice for anglers chasing metre-plus Barra in the big saltwater rivers of the Top End. They are also extremely effective in the impoundments throughout North Queensland. The newest Bombers to the range (the Longshots) have proven themselves to be a most effective.

GILLIES OCKTA

Incorporating Japanese design and technology, the Ockta lure is effective in attracting reef and bottom dwelling as well as pelagic species. These lures have a unique action and can be fished with most retrieve styles. They can be straight jigged, bounce jigged while drifting and cast and retrieved. With two exceptionally sharp swinging forged hooks set up on Kevlar connectors, hook up rates are increased. Ockta lures are perfectly balanced as to allow the lure to pulsate the skirts giving the appearance of a swimming octopus. There are 8 sizes from 40gm for the smaller estuary species right through to 300gm for the big bottom dwellers.

The Snapper species pack contains 101 pieces of tackle with red chemically sharpened Octopus hooks, swivels and slider rigs packed in a tackle box. Bonus spool of line included.

CODE: 28SPSN

GILLIES SINKER MOULDS

Gillies range of sinker moulds represent excellent value for money by offering a multi sized array of sinkers per mould. A great way to save money and to recycle lead.

Step 1

Step 2

Step 3

TIPS

Melt lead in a heavy cast iron pot in a well ventilated area and make sure that the pouring ladle or spoon is dry. Pre-heating the sinker mould will allow the molten lead to flow. Protective clothing and a breathing mask such as a respirator is highly recommended.

SNAP-LOC ROD HOLDER

The SNAP-LOC Rod Holder is a unique, one-step, instant strike Rod Holder that's ideal for general light to medium trolling and bait fishing. It's versatile and adaptable to any boat or fishing situation. The Universal Rail & Deck Mount Rod Holder offer many different mounting possibilities. When you place the rod, either spin or baitcast, into the holder, it pushes the front lever down and locks the rear lever over the top of the rod butt. The weight of the rod is sufficient to firmly lock the rod, any additional downward weight, even the drag of a sinker or lure locks the rod more securely in place.

SNAP-LOC

SNAP-LOC KEY FEATURES

- Foolproof locking device
- Suits both spinning and overhead reels
- Additional security lock fitted
- Most combos can be locked on foregrip or rear grip
- Clip in insert allows use of very small diameter rod butts
- Overhead reel stays upright
- Heavy duty vertical & horizontal adjustments
- Heavy duty lift & rotate lock gives total flexibility & precise rod direction control
- Rod holder can be quickly removed & fitted to another mount
- Slip resistant universal rail clamp
- UV, salt & oil resistant
- Stainless steel components

No amount of downward force can dislodge the rod. To remove it, just grab the foregrip and lift inboard while striking at the same time in one smooth action."

CODE : 23SLRH

- ◆ Each Rod Holder includes All mount options:
- ◆ Universal Rail, Side Deck & Flat Deck/ Pedestal Mount.
- ◆ Stainless Steel bolts also included.

GILLIES BANK ROD HOLDER

The Gillies Deluxe Bank Rod Holder is perfect for bank fishing on lakes, streams and rivers, it lets you enjoy relaxing, hands-free fishing. Just insert the spike into the ground and get the holder ready to cradle the rod in less than a minute. Size: 410mm x 820mm.

CODE: 30DBRH

GILLIES DELUXE ROD HOLDER

Gillies Deluxe Rod Holders bring a new dimension to the riverbank, lake or shore fishing. These rod holders have the ability to be height adjusted and angled to suit your preferred fishing situation.

Rod angle adjustment knob

Cushioned rod support arms

Telescopic height adjustment screw

Available in 2 lengths
Small 50cm / extends to 90cm
Large 65cm / extends to 110cm

ABOUT SCOTTY

Scotty is recognised as one of the world's leading manufacturers of rod holders and rod holder mounts. With innovative designs and many versatile mounting options, we're sure you'll find the exact combination you're looking for. Rod holders are great for rod storage but are also a very valuable fishing tool that work hand in hand with our Scotty Downriggers, enabling you to troll your lures at a specific depth. Here you will find the right gear addition to suit your fishing needs. For the full range please visit: www.scotty.com

WILDFISH FLY PACKS *Selected by Peter Morse*

The Wildfish fly selection packs are perfect for those new to fly fishing and even for some who might be not so new to the sport. There are two groups of packs in the range, freshwater and saltwater. The reality is that there's plenty of overlap. For example the Trout Streamer Pack would very easily be at home in the kit of a bass fisherman, or in fact a fly fisherman just about anywhere around the country. Conversely the Bass Pack contains flies that are just as at home in many tropical freshwater systems right across the north and in the Billabong Pack are flies that would light up the eyes of a bass fisherman. The 3 latest packs to compliment the range are the saltwater models: Flats, Inshore and Barra packs.

All Wildfish Fly Packs have 10 flies per pack that are proven fish takers for that particular application. All flies are hand tied from the Felty's stable.

DRY

Moderate/Fast Action

REDINGTON BEHEMOTH FLY REEL

The Behemoth reel combines the most powerful drag in its class with stunning aesthetics that push the limits of fly reel design. The unique, un-machinable, die-cast construction is coupled with a durable, interlocking, large-arbor spool design that both looks and functions like a premium reel. A super-heavy duty carbon fibre drag package brings the utmost in drag strength, reliability and performance to the family. Sized for your favourite 5-weight trout rod, and all the way up to saltwater ready, big-game sizes.

- Most powerful drag in its class, Adjustable, Carbon Fibre
- Large arbor design speeds retrieve and reduces line memory
- Oversized drag knob for easy adjustment
- Easily converts to left or right hand retrieve
- Deep V-Spool for increased backing capacity
- Twin moulded, soft-touch ergonomic handles
- Nylon reel case included and Lifetime warranty

REDINGTON CROSSWATER FLY REEL

The CROSSWATER reels have a unique design and are constructed from durable polymer lightweight material, that make them suitable for anything from trout and panfish up to bass. They're not a wonder of engineering, but they're definitely a solid choice for the angler looking to get started in the world of fly fishing without spending hundreds of dollars. The reels feature a reliable disc-drag system that offers fish-stopping performance with head turning looks.

SAGE SONIC FLY ROD **NEW**

Whether laying down dry flies with finesse, or delivering streamers to distant reaches, the NEW SONIC family of rods provides uncompromised versatility, with a balance of power and feel. Delightfully crisp and lightweight, the SONIC has a level of performance that stands out from the crowd with a fast action taper designed to cover a wide range of fishing applications from dry fly, streamers, to nymphing - floating lines to sinking. Built on Konnetic Technology blanks, casts with the SONIC are as intuitive as they are natural - responsive in hand with excellent tracking qualities. Handcrafted in the USA and packaged in a premium rod bag and tube, we've pulled out all the stops to create a family of rods ideal for any application - any angler. Cast With Confidence.

Hardwood insert with anodised aluminum up-locking reel seat

Super Plus snub-nose half-wells cork handle

SAGE FOUNDATION FLY ROD

Equipped with a high-performance blank (Graphite IIIe), the FOUNDATION has a fast action providing excellent casting power and effortless control. It's the very foundation of what defines a Sage rod - Performance - taking your game to another level. Whether you are chasing Bonefish on the flats, or exploring your backyard waters for Trout, the FOUNDATION series delivers the signature Sage feel. For over 35 years we've built performance rods one at a time on Bainbridge Island, USA. The same 27 sets of skilled hands that craft all Sage rods construct the FOUNDATION.

MAVERICK FLY ROD

Saltwater angling is more often a game of quick shots than long casts. Dropping a fly in front of a cruising fish 20ft off the bow can be the difference between success and failure during a day on the flats. In fact, most saltwater fisheries put a premium on getting the fly to the target quickly and that requires a quick cast into "the zone" for a chance of a high odds at a hookup. The quicker you can lay the fly down, the better the results. Sage's MAVERICK has been designed to maximise these quick-shot opportunities with a powerful tip section that drives the casting load down to more robust lower sections, making it easier to fire these quick efficient casts and helping the angler make the most of their finite opportunities. With a true saltwater specific backbone and design, the MAVERICK is ready for any salty challenge thrown its way.

MAVERICK SPECIFICATIONS AND FEATURES

ABOUT RIO

For more than 20 years, RIO has demonstrated passion, innovation and a pure love for the sport through its development of the industry's highest performance fly lines. And the great news is, we will continue to research, design and refine our products to ensure they are your preferred line of choice for years to come.

Some say that they are just fanatics, using their selfish needs to create the most sophisticated, strenuously tested products available... but RIO call it pride... pride in the promise to give you the absolute, hands-down, best of fly fishing excellence on your rod. RIO is fanatical about technology. And our cast members have donated literally thousands and thousands of hours on the water researching, designing and refining our products. All with one goal in mind – helping anglers hook, land and turn loose more fish!

SLICKCAST

OUTCAST  OUTLAST

THE SLICKEST, MOST DURABLE FLY LINE.
PERIOD.

Now available in Elite low stretch
SALTWATER fly lines.

NEW

Full range
over the
page

SLICKCAST

RIO's SlickCast creates the slickest, most durable coating on the market—producing the least amount of friction ever measured on a fly line. What does slick get you? For starters, line flies through the guides with higher line speeds for unprecedented and easy distance. The slick coating also allows anglers to fish more effectively as line slides out of the guides with less friction for extended drag-free drifts. Additionally, SlickCast continuously releases essential slickening agents that migrate to the line's surface. This ensures that the line remains as slick as the day it was made—giving anglers many years of high performance and easy distance. As for durability, SlickCast's proprietary formulation produces the toughest and most durable fly line coating in the world. Lab tests show that a line built with SlickCast lasts 140% longer than our nearest competitor in abrasion testing and lasts 33% longer when testing a fly line for cracking—that is one tough fly line.

CONNECTCORE

When you rely on touch to know what's going on in the depths, line stretch is the enemy. Our ConnectCore lines open up new worlds of perception and sensitivity with ultra-low stretch performance. Soft, subtle takes become positive grabs, and without stretch to dull reaction times, hook sets are instant and sure. ConnectCore. The secret weapon for success.

DIRECTCORE

In hot, humid conditions, DirectCore lines provide the stiffness you need to fire into the wind, with significantly reduced memory. Which means your line lies straighter on the water for a more direct connection to fly and fish. DirectCore is also 25% stronger than other monofilament cores of equal size, and stretches 30% less at breaking point. In short, DirectCore makes you a better angler on the flats, in the mangroves and off the beach.

CONNECTCORE PLUS

Building a better fly line starts at the core, and our low-stretch ConnectCore Plus provides a radical increase in line durability, coating smoothness and overall performance. ConnectCore Plus stretches 30% less than standard cores, and gives anglers all the benefits of a low-stretch core—enhanced sensitivity, less wasted energy and faster hook sets—with a significantly longer lifespan. It also allows hand stretching to easily remove memory coils for a more direct connection to fish and fly. The highest-performing, longest-lasting freshwater lines in the world are built around ConnectCore Plus. ConnectCore Plus is only found on ELITE tier fly lines.

MULTI DENSITY CONTROL

Multi Density Control is a combination of different density coatings along the length of a fly line. These different density coatings give anglers complete depth control when swinging a fly on a river, and perfect contact right to the fly. The exceptionally smooth, continuous blend in density changes results in extremely smooth loops while casting.

MAXFLOAT TIP

Tired of floating lines that work like sink tips? Fact is, the reduced coating at the narrow, tapered end of most floating lines doesn't have enough buoyancy to stay above water. RIO's MaxFloat Tips solves this age-old problem. Our all-new, proprietary tip coating formula floats more than twice as high as regular line tips, without any increase in diameter. That puts maximum floatation right where you need it for reduced drag, longer presentations and quieter pickups.

MAXCAST

Our new, ultra-sophisticated line coating redefines floating line performance. Made with a ground-breaking proprietary formula, MaxCast lines float higher, shoot farther, last longer and stay cleaner. The secret? The coating's advanced hydrophobic chemistry, which actively pushes water away from the line, resulting in radically improved floatation and reduced dirt adhesion. It also allows the line to slip more easily from the surface film for longer, quieter pickups. At the same time, MaxCast's coating formulation contains a sophisticated blend of permanent slickening agents, and slickening agents that continuously migrate to the line's exterior for enhanced shooting and durability.

EXTREME SLICKNESS

Every fly fisherman is looking for a slicker line, and for good reason. Slicker line means longer casts, which is something all anglers strive to achieve. XS Technology is the latest development from RIO's lab coats that focuses on creating an ultra slick line, with dirt-repelling tendencies. XS (Extreme Slickness) Technology began when RIO's chemists began reformulating conventional chemical combinations. Although RIO's formulas were great, our scientists are fly fishers, and by definition they want an even slicker fly line - it's just part of the deal. So first, they tackled the polyvinyl chloride (PVC) coating and through intense scrutiny down to the polymeric mix level, (say that 10 times fast) they defined some fundamental limitations. Out went the old PVC/silicone formulas and by methodically adding a little more of this, a little less of that, and a pinch of secret sauce, the lab coats cooked up a completely new and improved recipe. With XS Technology, RIO has developed a fly line that is slicker, more stable, and far less apt to attract dirt, and paired with AgentX Technology, it engineers a line that is less dense, casts further and more accurately, floats higher, lasts longer, and offers more consistent performance cast after cast, strike after strike, fish after fish.

AGENTX

Traditional, single-layer fly lines have to compromise between function and the need for durability and slickness. AgentX Technology makes the old compromise obsolete by bonding two separate coating layers onto one line. This proprietary process allows RIO line designers to optimize the specific performance of each line. For example, AgentX floating lines can use an inner layer with more buoyant microspheres, while the outer layer is formulated for maximum toughness and shooting ability. AgentX means the best of both worlds in a single fly line.

RIO SLICKCAST ELITE SERIES LINES

For full details on all of the Slickcast fly lines, please visit our website.

PREDATOR

RIO's new Elite Predator fly line is designed specifically to cast large and heavy flies with low-stretch ultra-slick performance.

RIO GOLD

The RIO Gold is the ultimate all-round fly line with low-stretch, ultra-slick performance. Excellent for rivers and lakes when long casting and control is required.

RIO GRAND

Designed for fast action fly rods, it is a full size heavier to easily load, as well as a low stretch connect core, with low-stretch, ultra-slick performance.

TECHNICAL TROUT

Easy casting all-round Trout line with a long, fine front taper to increase loop control and for the lightest of presentations, with ultra-slick performance.

PERCEPTION

This is an easy casting general purpose fly line that casts nymphs, dry flies, streamers and soft hackles with ease. An ideal fly line for river and lake fishing.

RIO GOLD

The RIO Gold is the ultimate all round fly line with a revolutionary taper design and ultra-slick performance.

RIO GRAND

This line is a full size heavier than the industry standard designed to load fast action fly rods, ultra-slick performance.

TECHNICAL TROUT

The line has a long head and back taper to increase loop control when carrying long lengths and for making precise casts to rising fish.

PERCEPTION

The short head makes this a particularly good line on smaller rivers and lakes, when long distance line control is not necessary and is a great all-round line.

FLUOROFLEX STRONG TIPPET

NEW

30YDS	SIZE	LB	30YDS	SIZE	LB
43R22431	7X	2.6	43R22037	4X	7.3
43R22432	6.5X	3.1	43R22097	3X	8.8
43R22033	6X	3.8	43R22098	2X	11.2
43R22034	5.5X	4.5	43R22078	1X	13.3
43R22035	5X	5.2	43R22079	0X	15.5
43R22036	4.5X	6.1			

Ultra-Strong, 100% Fluorocarbon with exceptionally high tensile strength and exceptionally easy to tie knots. The high break strength to diameter ratio makes this a fantastic fluorocarbon for the Trout fly fisher.

TWO-TONE INDICATOR

NEW

30YDS	SIZE	LB
43R22097	6X	3.0
43R22098	5X	4.2
43R22078	4X	6.0
43R22079	3X	7.0
43R22080	2X	8.5
43R22081	1X	11.0

Opaque two tone 8" sections of fluorescent pink and fluorescent chartreuse, or black and white color changing tippet with highly defined hard color changes. These color breaks create maximum contrast to allow anglers to get visual cues when tight line nymphing.

POWERFLEX WIRE BITE

NEW

CODE	SIZE	LENGTH
43R22145	20	15FT
43R22146	30	15FT
43R22147	40	15FT

A high quality super smooth braid that is 100% reliable. A good compromise between thinness and the ability to make blind splice loops. This backing is easier to knot than most other brands that are very thin but have too tight a weave for a blind spliced loop. Low stretch.

POWERFLEX TIPPET

30YDS	SIZE	LB	110YDS	SIZE	LB
43R22001	7X	2.4	43R22020	7X	2.4
43R22002	6X	3.4	43R22021	6X	3.4
43R22003	5X	5	43R22022	5X	5
43R22004	4X	6.4	43R22023	4X	6.4
43R22005	3X	8.2	43R22024	3X	8.2
43R22006	2X	10	43R22025	2X	10
43R22007	1X	13	43R22026	1X	13
43R22008	0X	15	43R22027	0X	15

RIO Powerflex Tippet is a high knot strength copolymer nylon tippet that features superb knot strength, stretch and suppleness to make this an excellent nylon tippet material for almost all trout fly fishing needs. It is a light grey color to enhance its camouflage ability on the water.

POWERFLEX PLUS TIPPET

50YDS	SIZE	LB
43R22031	7X	2.5
43R22032	6X	4
43R22033	5X	6
43R22034	4X	7.5
43R22035	3X	9.5
43R22036	2X	12

RIO'S Powerflex Plus Tippet is the strongest nylon tippet material ever made, with tensile strengths up to 20% more than regular tippet. A highly technical formulation of the nylon copolymer manufacturing process has resulted in this prodigious strength increase, without compromising knot strength or suppleness.

FLY LINE BACKING

CODE	LBS	COLOUR
43R20500	20	CHART
43R20501	30	CHART
43R20510	20	ORANGE

A high quality super smooth braid that is 100% reliable. A good compromise between thinness and the ability to make blind splice loops. This backing is easier to knot than most other brands that are very thin but have too tight a weave for a blind spliced loop. Low stretch.

FLUOROFLEX FRESHWATER

30YDS	SIZE	LB
43R22113	7X	2
43R22114	6X	3
43R22115	5X	4
43R22116	4X	5
43R22117	3X	6
43R22118	2X	8
43R22119	1X	10
43R22120	0X	12

Fluoroflex Freshwater Tippet is a medium stiff, 100% fluorocarbon tippet material and is ideal for Steelhead, Salmon, Trout and Bass, and for casting larger flies. Clear in color, this freshwater tippet is nearly invisible to fish.

SUPPLEFLEX TIPPET

30YDS	SIZE	LB
43R22040	7X	2
43R22041	6X	3
43R22042	5X	4.7
43R22043	4X	6.1

The RIO Suppleflex Tippet is incredibly strong, with excellent knot strength and, as its name suggests, unbelievably soft and supple. A featherweight presentation does not impede the natural movement of a fly in the current, the Suppleflex is the perfect choice for the trout angler fishing with smaller flies.

FLUOROFLEX SALTWATER

30YDS	LB
43R22100	8
43R22101	10
43R22102	12
25YDS	
43R22103	16
43R22104	20
20YDS	
43R22105	25

RIO's Fluoroflex Saltwater Tippet is medium stiff and made from 100% fluorocarbon material. A tough saltwater tippet, the Fluoroflex is abrasion resistant, super strong, and easy to knot. Great for casting the largest of flies and in tough winds, this tippet is perfect for all saltwater species.

HARD MONO SALTWATER

30YDS	LB
43R22421	8
43R22422	10
43R22423	12
43R22424	16
43R22425	20
43R22426	25
43R22427	30

RIO's Hard Mono Saltwater tippet is a very stiff, super abrasion-resistant nylon tippet material. Ideal for casting the largest flies and in tough winds to get the very best turnover.

LINK S DARK CAMERA

NEW

The NEW LINK-S-DARK is a trail camera like no other, because so much of what the camera offers is only available from SPYPOINT. Integrated solar panel and lithium battery technology delivers an all-in-one unit with incredible battery life.

Couple that with the fastest trigger speed available in a trail camera, and the Hybrid Illumination Technology (HIT) flash system that lets you customise your flash, and you have an absolute powerhouse of a trail camera taking your scouting to new levels.

FEATURES

- ◆ Integrated solar panel and lithium battery technology
- ◆ Hybrid Illumination Technology (HIT) flash system that lets you customise your flash
- ◆ Fastest trigger speed available in a trail camera
- ◆ Absolute powerhouse of a trail camera taking your scouting to new levels

Code: 83LSD

LINK MICRO S LTE CAMERA

NEW

The LINK-MICRO-S-LTE marries the incredible size and value of our MICRO family with our integrated solar panel and lithium battery technology to deliver an incredibly value-packed and functional trail camera. The LIT-10 rechargeable battery pack is included!

The LINK-MICRO-S-LTE from SPYPOINT gives you the incredible battery life of our integrated solar panel technology and free LIT-10 rechargeable lithium battery pack, with the value you would expect from our LINK-MICRO family. Save money by making fewer trips to your hunting property to change batteries, check cards, and by never buying batteries again.

The LINK-MICRO-S-LTE connects to the LTE cellular network, ensuring that the camera can provide years of service in the ever-evolving landscape of cellular network technology.

The LINK-MICRO-S-LTE comes with the new LIT-10 rechargeable lithium battery pack included, which is charged directly by the integrated solar panel. The LIT-10 battery pack replaces the standard battery tray of the LINK-MICRO design, for foolproof installation.

FEATURES

- ◆ 10 megapixels
- ◆ 0.4 second trigger speed
- ◆ 80-foot detection and flash range

Code: 83LMS

LINK-MICRO-LTE CAMERA

The LINK-MICRO-LTE from SPYPOINT continues the legacy of the MICRO family, offering an incredible performance and opening the door to the definitive mobile scouting solution, at a price that you can afford. The LINK-MICRO-LTE is a photo-mode only camera, with multi-shot capabilities.

All camera settings are managed in the app, where the full compliment of advanced scouting tools like enhanced AI species filters, mapping and weather integration can be found. The LINK-MICRO-LTE takes advantage of the LTE cellular network for improved camera reliability and longevity.

FEATURES

- ◆ 10 megapixels
- ◆ 5-second trigger speed
- ◆ 80-foot detection and flash range

Code: 83LMLTE

CELL LINK

NEW

The CELL-LINK from SPYPOINT brings the advantages of our definitive mobile scouting solution to the cameras you didn't think you could connect. The CELL-LINK connects via the SD card slot to turn virtually any non-cellular camera into a cellular device. The CELL-LINK connects to the LTE cellular network to ensure years of service in the ever-evolving cellular network technology.

The CELL-LINK connects to your non-cellular camera via the SD card slot. Plug our SD card cable into the card slot on your camera, route the cable down to the bottom of the camera housing, and close the camera door on the cable. The flexible, rubberized cable has been designed to be closed in the camera door and maintain the weather proofness of your camera. Then connect the other end of the cable to the CELL-LINK and install above the camera.

FEATURES

- ◆ Compatible with the LIT-10 rechargeable lithium battery pack
- ◆ Universal compatibility
- ◆ LTE network connectivity

Code: 83CL

SPYPOINT APP

The SPYPOINT app is your central hub for device and photo management, as well as putting SPYPOINT advanced scouting tools to use so you can formulate a better plan when hunting seasons arrives. See your photos without the time, cost, or disruption of going to your camera is a great benefit, but it's just the beginning of what the SPYPOINT app can do.

Free to download and easy to use, the SPYPOINT App is a complete management and scouting tool to help save you time and money, and make you more successful in the field. SPYPOINT offers the only free photo transmission plan for cellular devices, but if you need more than 100 photos sent per month, you can choose a paid plan that fits your needs.

WHAT YOU CAN DO FROM YOUR SPYPOINT APP

- ◆ Download FULL-HD Photos
- ◆ Sort & Tag Favourite photos in the Gallery
- ◆ View Multiple Device Status & Manage Settings
- ◆ BUCK TRACKER Species Filter
- ◆ Activate a Device
- ◆ Set & Control Notifications
